

ACCESSORY GUIDE 2012
AUXILIARY LIGHTING & MORE

www.myhellalights.com

HELLA introduces a brand new website oriented towards the end consumer. The website features both Halogen and Xenon auxiliary lamps, daytime running lights, upgrade kits, accessories, and bulbs with tons of information and downloads.

The product pages explain what the product is ideal for, features, explanation of technology used, package contents, and part numbers. Diagrams, beam patterns, testing information, accessories lists and more are available for each product.

- **All product dimensions are measured in inches and millimeters.**

- Every lamp that complies with ECE regulations is marked 'ECE', every light that conforms with FMVSS (and CMVSS) standards is marked 'SAE'.

- ECE-marked lamps are for off-road-use in the US.

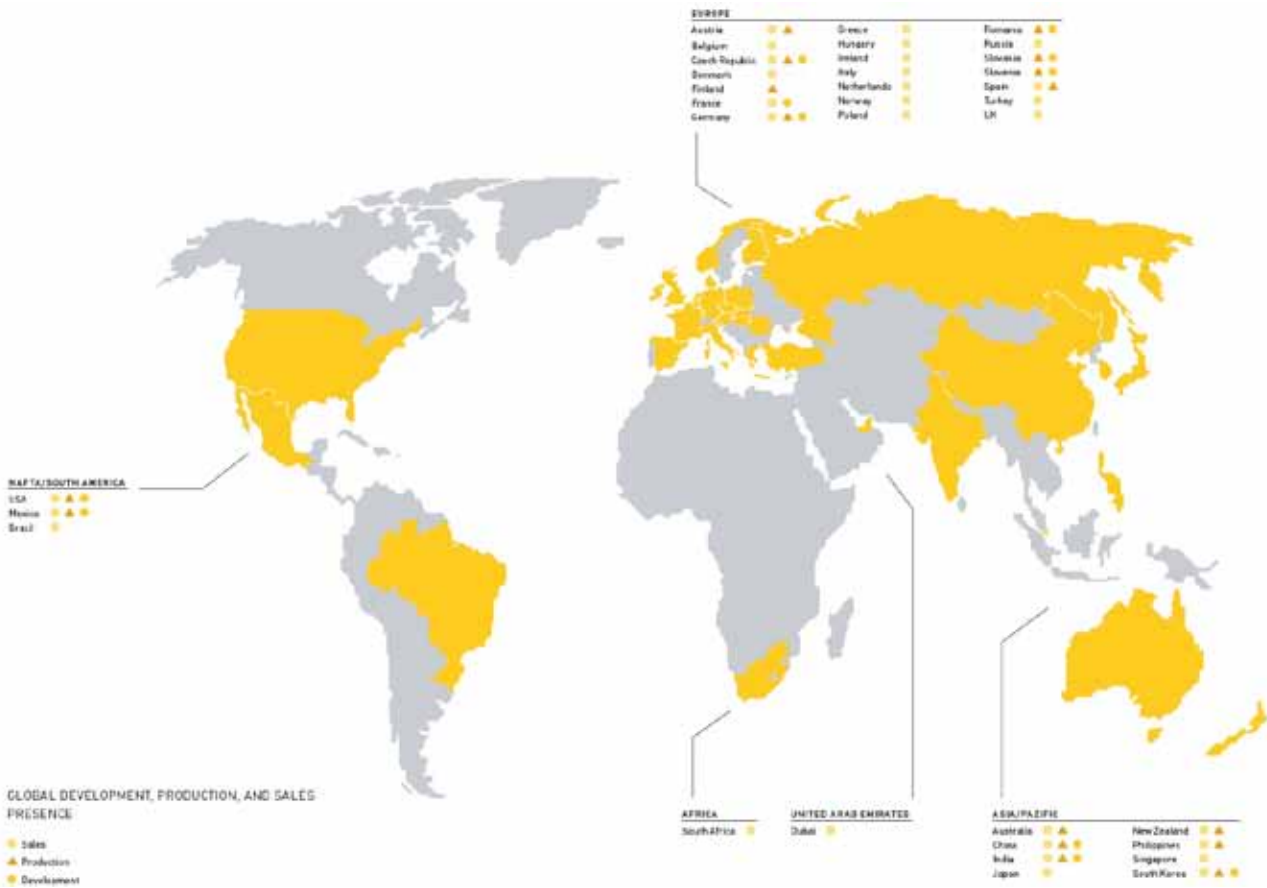

*Check your local regulations before installing any lights on your vehicle.

**Images and information are for reference only, subject to change without notice.

HELLA WORLDWIDE

HELLA develops and manufactures components and systems for lighting technology and electronics for the automotive industry. In addition, joint venture companies also produce complete vehicle modules, air conditioning systems and vehicle electric systems. HELLA has one of the largest aftermarket organizations in the world for automotive parts and accessories, with its own sales companies and partners in more than 100 countries. HELLA is one of the top 50 automotive parts suppliers in the world and one of the 100 largest industrial companies in Germany. More than 25,000 people work in 70 manufacturing facilities, production subsidiaries and joint ventures all over the world. Nearly 3,000 engineers and technicians work in research and development throughout the company group. Customers include all leading vehicle and system manufacturers, as well as the automotive parts aftermarket.

WELCOME TO THE AGE OF THE LED

There are many reasons why light emitting diodes are being used in more and more automotive areas. First of all, they have simply proven themselves to be the better solution in many ways. Secondly, as a lighting pioneer, HELLA made use of these “better solutions” early on in a broad range of applications.

When it comes to lighting technology, achieving milestones is nothing new for HELLA. Again and again, the international family-owned and operated company has assumed a pioneering role by pooling its expertise from the fields of light, electronics and thermal management to create new and innovative products. A uniquely strong combination for developing LED products, especially with regard to dynamic LED lighting systems, which will be increasingly relied on for active lighting functions.

Technology follows design!

Cutting-edge product designs can only be realised by applying the best possible technological expertise. Long-term experience in electronics, thermal engineering and design ensure that LED headlights and lighting systems are developed with consistently high lighting performance.

By constantly developing and enhancing the options and areas of applications for LEDs, HELLA is not only involved in definitively shaping the LED era, but is also making a significant contribution toward increasing active safety.

The technical, economic and safety-related advantages of LEDs speak for themselves

- High service life
- No downtimes or assembly times
- Minimal energy consumption
- Wear-free and maintenance-free
- Higher effective visibility
- Dust and water-resistant
- Compact sizes
- Rapid response times
- New scope for design

HELLA integrates over 364,000,000 LEDs per year.

LEDS – BENEFITS IN SERIES PRODUCTION

LEDs are replacing conventional light bulbs in more and more vehicles - in the meantime, even in series production at many locations. Decisive in this case are the technical benefits, such as longer service life or smaller sizes, which guarantee, among others, better feasibility from an ergonomic perspective. For design engineers, an important factor resulting from this is the considerable increase in design freedom. The result is cutting-edge product designs, such as the "LEDayFlex" daytime running light modules for passenger cars, trucks and caravan

HELLA installs LEDs in different optical lighting systems based on customer requirements or special product requirements. In this case, simply through LED positioning, new design possibilities can be tapped into. In conjunction with the so-called light aperture bodies or light transmitters, technology is increasingly becoming an inherent element in innovative developments for combination rear lights.

OPERATIONAL SAFETY

Using the LED stop lights as an example, it can be clearly explained how a supposedly small difference can have considerable positive effects:

In conventional bulbs, the filament has to be warmed 200 ms so that it can transmit the necessary brightness. LEDs, on the other hand, require no warm-up phase. This means the light signal reaches its target value faster. This optimises the early warning system for the road users following your car and reduces their response time. Such fractions of a second can prevent or mitigate collisions: at a speed of 56 mph (90 km/h), the stopping distance is reduced by about 13ft (4 m).

The color temperature of 6000 Kelvin is very similar to daylight. Drivers operating in such lighting conditions stay alert longer.

Halogen (Yellowish)

Xenon (Bluish)

LED (Daylight)

Energy consumption

Compared to conventional bulbs, the use of LEDs considerably reduces energy consumption with the same light output. Consequently, fuel consumption and exhaust gas emissions are also reduced.

No maintenance

LEDs with a service life of up to 100,000 hours last almost as long as the service life of a vehicle. Because they are nonwearing and maintenance-free, there are no additional costs from failures or service downtimes.

FUNCTIONAL SAFETY

Fleet managers and drivers expect functional safety without any ifs and buts; In other words, vehicle components with a high quality standard and long service life. HELLA LED lights meet these requirements. They are developed and produced according to the strictest quality standards. HELLA tests their everyday driving suitability in the toughest series of simulations: Stressfactors such as temperature, moisture and current feed lead to internationally recognised **AECQ** qualification in long-term reliability tests. But this norm is not sufficient for HELLA. The LEDs are therefore subjected to thousands of hours of additional stress and service life testing. This is why, in addition to the visual features, the electrical and thermal features are decisive for HELLA.

LED-light failure check and correct electrical connection Operation of LED lights / LED headlights with AC voltage or synchronised DC voltage is not permitted. The light's individual functions may only be operated with an on-board fuse of max. 3 A, the individual functions of a headlight with an on-board fuse of max. 10 A (vehicle-specific 5 A). In case of an on-board current limit amounting to the above specification due to the on-board control unit, there is no need for an additional fuse for the lights. Due to the low watt output of LED lights, which are distinctly different from a bulb version, problems can arise in bulb failure control when operating vehicles.

RADIATION INTENSITY

Light distribution should be considered objectively

Different applications require different auxiliary lights. The Isolux diagrams used in this catalog show a comparison of light distributions. The red-orange colouring marks the area with high illumination intensity. From yellow through green to blue, the illumination intensity decreases depending on distance.

Fog light radiation is wide but not over a long distance (to avoid, as far as possible, reflection through fog droplets).

Lux is the unit used to measure light

This indicates the luminous flux which is projected by the light source onto a certain surface. For example; an office should be illuminated with at least 500 Lux and the human eye can still read a newspaper without any problems at 1 Lux. The values under the Lux axis show where the respective illumination intensities are achieved in the isolux diagrams.

The right light source

The light sources are always included with Xenon auxiliary lights. You will find the right bulbs for the halogen auxiliary lights on pages 103-107

CELIS® light guides

With CELIS® technology (Central Lighting Systems), fibreglass cables or thin plastic rods transport the light from a central light source to where it is required.

Subjected to stringent tests

Hella auxiliary lights have to undergo extreme quality tests. They are homologated in accordance with the type approval requirements of the US and/or EU licensing procedure.

Free-Form Technology

Compared with other typical auxiliary lights of the same size on the market, Hella auxiliary lights, with free-form reflectors, are significantly more efficient and have improved light output.

XENON & BI-XENON TECHNOLOGY

The development of Xenon lighting systems was probably the largest quantum leap in terms of safety in the history of automotive lighting. A special high-performance electronic system controls the regulation of the switching on of the light, constant output and the action necessary in case of problems. The system has two decisive advantages compared with the light from conventional bulbs: a Xenon bulb provides twice as much light as a modern H7 bulb but only requires 2/3 of the power. Thanks to this doubling of the light output, road illumination is brighter and wider. Xenon light even produces daylight quality light in the darkest night-time conditions. The driver experiences normal visibility conditions, does not tire as quickly, and is much more relaxed – even during long drives. Thus Xenon light brings enormous benefits for both road safety and driving comfort.

As the European market leader in the sector of Xenon technology, Hella has pushed development even further. The result of this development was the creation of the Bi-Xenon projection module. In this module, the light of one single Xenon lamp is used for low beam and high beam light at the same time. A movable shutter is responsible for the beam pattern according to the function selected: When the shutter is raised it produces the cut-off prescribed for low beam light, when lowered it makes room for the high beam light. An additional halogen high beam light takes over the flash-to-pass headlamp function. The Bi-Xenon light is projected onto the road through a large glass lens with a diameter of 70 millimeters.

ECE & SAE APPROVALS

ECE Approval: The World Forum of Vehicle Regulations is a working party of the United Nations Economic Commission of Europe (ECE). It is tasked with creating a uniform set of regulations for vehicles, which makes them legal on the streets of participating countries.

SAE Approval: The USA has its own set of standards, which are called the Federal Motor Vehicle Safety Standards (FMVSS), which are based on proposals of the Society of Automotive Engineers (SAE). The USA does not recognize ECE approvals. Canada has its own Canada Motor Vehicle Safety Standards (CMVSS), broadly similar to FMVSS, but Canada does also accept ECE-compliant headlamps.

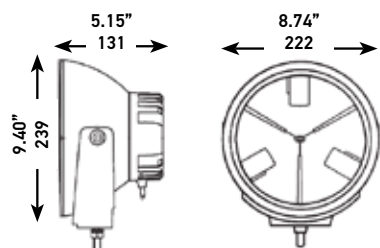

Every lamp that complies with ECE regulations is marked 'ECE', every light that conforms with FMVSS (and CMVSS) standards is marked 'SAE'.

ECE-marked lamps are for off-road-use only in the USA.

Check your local regulations before installing any lights on your vehicle. All information is subject to change and can be altered at any time.

Rallye 4000 LED

The new Rallye 4000 LED from HELLA is shaping the future of LED lighting. Its innovative triple reflector with LED position light in Kartoval optics produces a striking night-time design. Its white high-power LEDs ensure optimal visibility and active road safety in any driving situation. This multi-volt, premium auxiliary lamp is a flawless fit for trucks, SUVs and off-road vehicles. This means HELLA is giving you the ultimate in LED lighting.

Features

- Three High performance LED's
- Low power consumption
- Very high lifespan - no bulb change necessary
- Dust and waterproof
- Homogenous and ideal illumination due to computer optimised fine tuning of LED light sources and free-form technology
- Reduces driver fatigue
- Special blue retaining ring to indicate LED technology

Kit Includes

- 1 Lamp
- Mounting Instructions

Micro FF LED Lamp

Introducing the new Micro FF LED auxiliary light from HELLA, the next step in efficient LED lighting. With its six high-power LEDs, it creates a flood beam pattern which is close to daylight in color. Each LED has its own state-of-the-art reflector, creating the unique look of this lamp. The electronics are embedded in a shock-resistance die-cast housing, making this lamp a perfect fit for trucks, ATVs and UTVs.

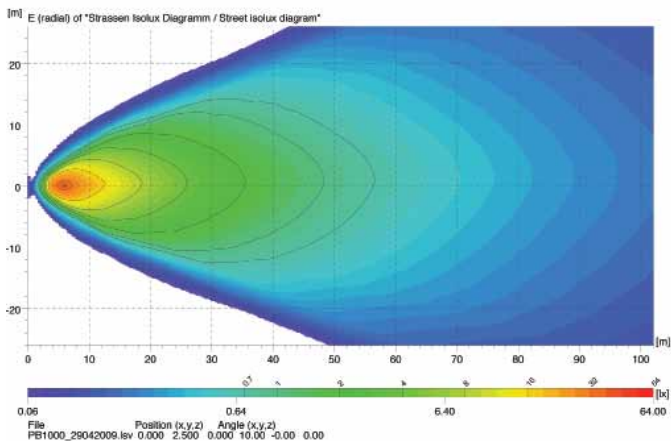

Features

- Six High performance LED's
- Close range illumination
- Low power consumption
- Very high lifespan - no bulb change necessary
- Dust and waterproof
- Aluminum die cast housing
- Integrated DT connector
- Wire Leads with 2-pin DT connector (200mm - 7.9") included
- Free-Form technology

Kit Includes

- 1 Lamp
- 1 Wire Harness with DT connector
- Mounting Instructions

Micro 70 LED

MICRO 70 LED LAMP KIT

Micro 70 LED Off-Road Lamp Kit H15176201

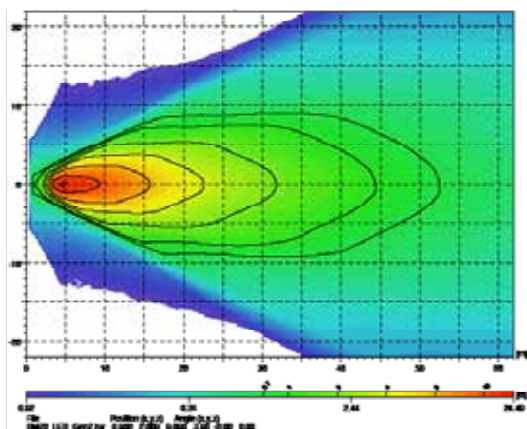

SPARE PARTS

PART NUMBER

Wire Harness H84994491

Relay - 12V/40A 933791061

Switch - LED green H61923001

Whether you are blazing the trails, or carving your favorite mountain road, the Micro 70 LED kit is for you. We started with HELLA's legendary Free Form Reflector design, added 4 OE spec. LED's, and packed it all into a die-cast Metal housing for a revolutionary new lamp. It's small, durable, and uses only 15 Watts of power per lamp. It's small in size, small on power, and big on output (600 Measured Lumens per Lamp).

Features

- Four High performance LEDs
- Small and compact
- Low power consumption
- Very high lifespan - no bulb change necessary
- Dust and waterproof
- Aluminum die cast housing
- Clear glass lens
- Close range illumination
- Free-Form technology

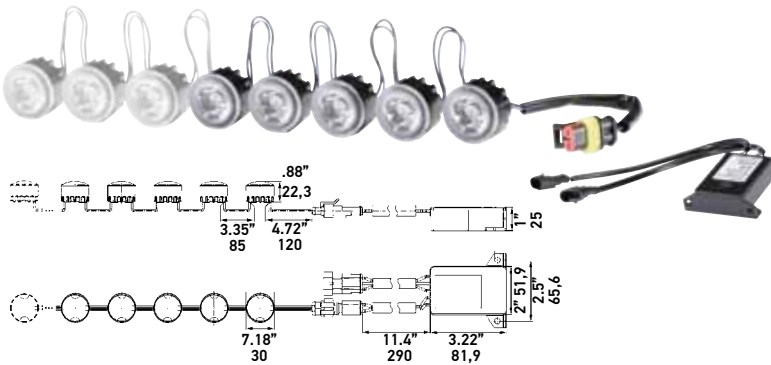

Kit Includes

- 2 Lamps
- 1 Wire Harness
- 1 Relay
- 1 Switch
- Mounting Hardware and instructions

ACCESSORIES	PART NUMBER
Wiring Harness for LEDay Flex Daytime Running Lights	165959001

Ideal For

- Safety in traffic
- High visibility for other drivers
- Universal application

Features

- LED daytime running lights set with position light
- Kit includes 2 module chains with between 5 to 8 LED modules that can be configured into the fascia of the vehicle
- The individual modules are circular and have a diameter of 1.1" (30 mm)
- Each individual module contains one high-power LED with light distribution created by the lentil-shaped lens.
- The metal housing safely protects the lighting electronics against road debris and is also used for heat dissipation
- The system is connected with the vehicle electric system via a 3-pole AMP-super sealed plug

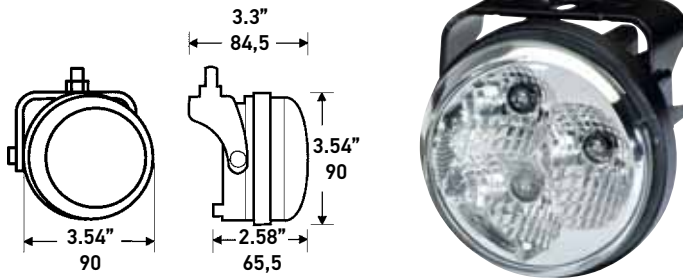

Kit Includes

- 2 Module Chains
- 2 Control Units with Wiring Harness
- Mounting Hardware
- Mounting Instructions

SPECS	
Voltage	9-33V
Beam Pattern	DRL
Number of LEDs	1 per Module
Power Consumption	15W per Module Chain (for 5 Module Version)
Housing Material	Magnesium

Features

- Zinc die-cast metal housing with matte black finish
- 24% smaller than Rallye 4000 Xenon
- Modern clear glass design plus stylish FF reflection
- 4th generation Xenon ballast unit with 3' long shielded cable between lamp and electronic Xenon ballast unit for installation flexibility
- Ballast features disconnectable plugs between the lamp and ballast unit for improved installation possibilities
- Housing, ring, and bracket made of sturdy zinc die-casting for lasting durability
- Knurled knobs for quick lamp adjustments

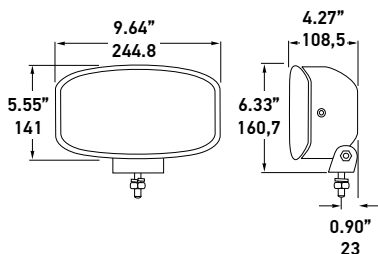

Single Lamp Includes

- 1 Lamp
- 1 Xenon Capsule
- 1 Xenon Ballast
- 1 Wiring Harness
- Mounting Hardware
- Mounting Instructions

SPECS

Voltage	12V
Beam Pattern	Driving, Pencil
Light Source	D1S Xenon capsule
Ballast Unit	External Ballast - Gen 4
Power Consumption	35W
Housing Material	Die-cast zinc
Optics	Reflector
Lens Material	Glass
Connection	Wire Harness with connector
Mounting	Upright
Bracket	Die-cast zinc
Approval	ECE

Jumbo 320 Xenon

Ideal For

- Large applications
- Extreme terrain

Features

- Innovative clear lens design and modern rectangular shape
- Long-range, powerful illumination that resembles daylight
- Magnesium free-form reflector
- 6 LEDs for position light function

Single Lamp Includes

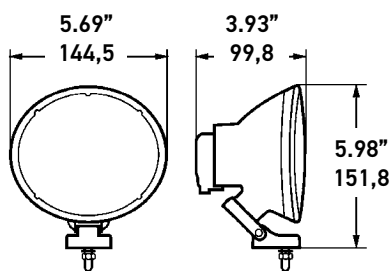

- 1 Lamp
- 1 Xenon Capsule
- 1 Xenon Ballast
- 1 Wire Harness
- Mounting Hardware
- Mounting Instructions

PART NUMBER

H1 12V/55W Hella Standard Bulb (single) DOT/SAE H83115001

Lens/Reflector Unit - Rallye 3000 Driving Beam 161825031

SPECS

Voltage 12V/24V

Beam Pattern Driving

Light Source (H1 12V/55W Bulb)

Power Consumption 55W

Housing Material ABS

Optics Reflector

Lens Material Glass

Connection Wire Leads

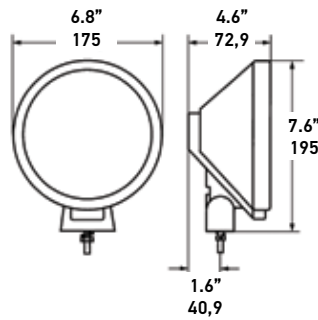

Mounting Upright

Bracket Steel

Approval ECE

Rallye 3000 Compact Fog

Ideal For

- Rural, night driving
- Off-road activity

Features

- Crystal clear glass lens
- Optimized free-form reflector
- Black ABS housing with silver bezel and black accent stripes
- 22% smaller than Rallye 3000

Single Lamp Includes

- 1 Lamp
- Mounting Instructions

RALLYE 3000 COMPACT FOG

Rallye 3000 Compact Fog Lamp (without bulb) 009390001

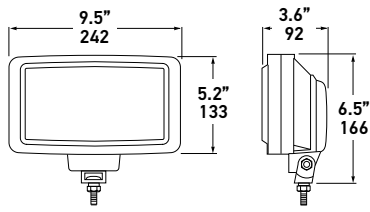

ACCESSORIES	PART NUMBER
White Stone Shield	165049001
Clear Color Shieldz - Protective Films (pair)	H87988371

Lens/Reflector Unit - Hella 450 Driving Beam	137006021

SPECS	
Voltage	12V
Beam Pattern	Driving
Light Source	H3 12V/55W Bulb
Power Consumption	55W
Housing Material	ABS
Optics	Reflector/Lens
Lens Material	Glass
Connection	Wire Leads
Mounting	Upright / Pendant
Bracket	Stainless Steel
Approval	SAE / ECE

HELLA 450 Fog

Ideal For

- Rural, night driving
- Off-road activity
- Foggy conditions

Features

- Light-weight design
- Bonded glass lens
- Aluminum vapor-coated reflector
- Great for most auxiliary lighting applications
- Bonded glass lens

Single Lamp Includes

- 1 Lamp
- 1 Halogen Bulb
- 1 Stone Shield
- Mounting Hardware
- Mounting Instructions

Kit Includes

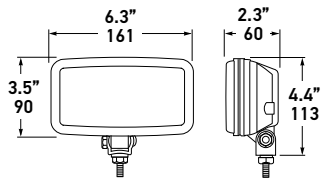

- 2 Lamps
- 2 Halogen Bulbs
- 2 Stone Shields
- 1 Wiring Harness
- 1 Switch
- 1 Relay
- Mounting Hardware
- Mounting Instructions

CONVERSION HEADLAMPS

7"x6" Rectangular Conversion Headlamps

Ideal For

- Retrofitting
- Replaces old sealed beam lighting technology

Features

- Produces 50% more powerful beam on low beam
- Produces 25% more powerful beam on high beam
- Single lamp fits left or right
- ECE versions for off-road use only in the USA

7"x6" RECTANGULAR CONVERSION HEADLAMP KIT, HIGH/LOW BEAM (ECE)

7"x6" Rectangular Conversion Headlamp Kit, high/low beam (ECE)

003427811

Includes

- 2 Lamps
- 2 H4 12V 60/55W bulbs
- 2 Dust boots

7"x6" RECTANGULAR CONVERSION HEADLAMP, HIGH/LOW BEAM (SAE/DOT)

7"x6" Rectangular Conversion Headlamp, high/low beam (SAE/DOT)

003427291

Includes

- 1 Lamp
- 1 HB2/9003 12V 60/55W bulb
- 1 Dust boot

7"x6" RECTANGULAR CONVERSION HEADLAMP, HIGH/LOW BEAM (ECE)

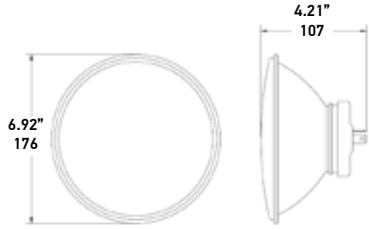

7"x6" Rectangular Conversion Headlamp, high/low beam (ECE)

003427861

Includes

- 1 Lamp
- 1 H4 12V 60/55W bulb
- 1 Dust boot

7" Round Conversion Headlamps

Ideal For

- Retrofitting
- Replaces old sealed beam lighting technology

Features

- Produces 50% more powerful beam on low beam
- Produces 25% more powerful beam on high beam
- Single lamp fits left or right
- ECE versions for off-road use only in the USA

7" ROUND CONVERSION HEADLAMP KIT, HIGH/LOW BEAM (ECE)

7" Round Conversion Headlamp Kit, high/low beam (ECE)

002395801

Includes

- 2 Lamps
- 2 H4 12V 60/55W bulbs
- 2 Dust boots

7" ROUND CONVERSION HEADLAMP, HIGH/LOW BEAM (SAE/DOT)

7" Round Conversion Headlamp, high/low beam (SAE/DOT)

002395301

Includes

- 1 Lamp
- 1 HB2/9003 12V 60/55W bulb
- 1 Dust boot

7" ROUND CONVERSION HEADLAMP, HIGH/LOW BEAM (ECE)

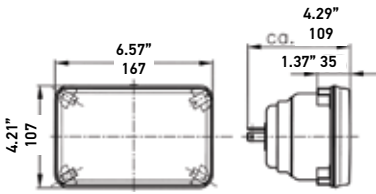

7" Round Conversion Headlamp, high/low beam (ECE)

002395991

Includes

- 1 Lamp
- 1 H4 12V 60/55W bulb
- 1 Dust boot

4"x6" Rectangular Conversion Headlamps

Ideal For

- Retrofitting
- Replaces old sealed beam lighting technology

Features

- Produces 50% more powerful beam on low beam
- Produces 25% more powerful beam on high beam
- Single lamp fits left or right
- ECE versions for off-road use only in the USA

4"x6" RECTANGULAR CONVERSION HEADLAMP KIT, HIGH/LOW BEAM (ECE)

4"x6" Rectangular Conversion Headlamp Kit, high/low beam (ECE) 003177801

Includes

H1 12V/55W Hella Standard Bulb (single) DOT/SAE	H83115001
Rubber Boot	145943001

SPECS

Voltage	12V
Beam Pattern	Low Beam
Light Source	H1 12V/55W Bulb
Power Consumption	55W
Housing Material	Magnesium
Optics	Lens
Lens Material	Glass
Connection	Bulb Plug /Packard Connector / Wire Leads
Mounting	Flush
Bracket	Aluminum
Approval	SAE / ECE

DE 120mm Modular Fog Lamp

Ideal For

- Custom applications

Features

- Magnesium housing and reflector
- Includes metal housing frame

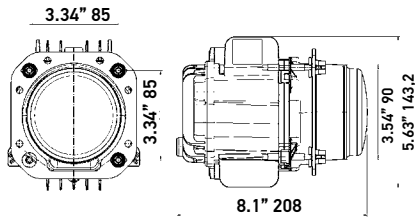

Single Lamp Includes

- 1 Lamp
- Mounting Hardware
- Mounting Instructions

DE 120MM FOG	
DE 120mm Fog Modular (without bulb)	007834017
ACCESSORIES	PART NUMBER
H1 12V/55W Hella Standard Bulb (single) DOT/SAE	H83115001
H1 24V/70W Hella Standard Bulb (single)	H83115071

Optics	Lens
Lens Material	Glass
Connection	Bulb Plug
Mounting	Flush
Bracket	Aluminum
Approval	SAE / ECE

90mm Bi-LED High/Low Beam

Ideal For

- Universal application
- Retrofit

Features

- High performance LEDs
- Very homogenous light output
- Maintenance free module with more than 15,000 operating hours
- DE (Projector Lamp)

Single Lamp Includes

- 1 Lamp
- Mounting Hardware
- Mounting Instructions

90MM BI-LED HIGH/LOW BEAM

90mm Bi-LED High/Low Beam Premium Module 010820021

ACCESSORIES

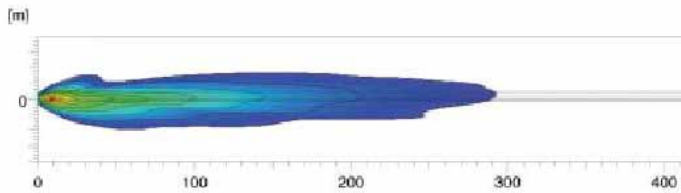

PART NUMBER

Mounting Frame 169580011

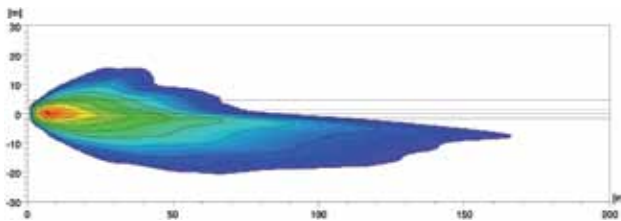

SPECS

Voltage	9-32V
Beam Pattern	ECE High Beam/ Low Beam
Number of LEDs	6
Power Consumption	35W
Housing Material	Plastic
Optics	Lens
Lens Material	PC
Connection	Harness with Amp Connector
Mounting	Flush
Bracket	N/A
Approval	ECE

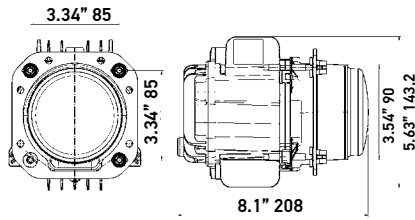

High Beam

Low Beam

90mm LED Low Beam

Ideal For

- Universal application

Features

- High performance LEDs
- Very homogenous light output
- Maintenance free module with more than 15,000 operating hours
- DE (Projector Lamp)

Single Lamp Includes

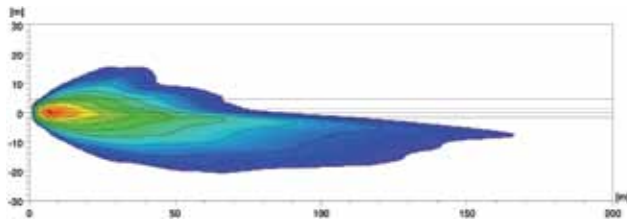

- 1 Lamp
- Mounting Hardware
- Mounting Instructions

90MM LED LOW BEAM

90mm LED Low Beam Premium Module 010820001

ACCESSORIES **PART NUMBER**

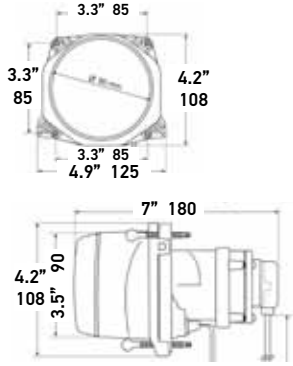

Mounting Frame 169580011

SPECS

*All bulbs are 12V and are sold in twin blister packs.

HELLA's High Performance Xenon Blue Bulbs are the new market standard. Produced under Hella's stringent testing requirements, our bulbs beat all others on the market. Correct filament alignment assures maximum light output. The blue glass provides the crisp white beam pattern consumers demand. Hella's Performance Xenon Blue Bulb range features on-road, DOT-compliant bulbs in all popular base types, as well as higher-wattage off-road-use bulbs.

Halogen bulbs by Hella can be relied upon for their long life and light output. Rigorous testing ensures our bulbs will stand up to the wear and tear of everyday driving. OEM quality.

Xenon (HID) Capsules

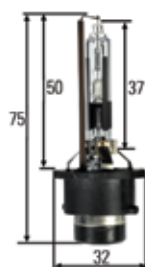

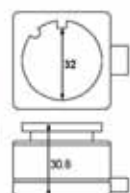

Bulb Type	Wattage	Part Number	Color
D1S	35	H83074001	Standard
D2R	35	H83070001	Standard
D2S	35	H83075001	Standard
D2S	35	H83076001	Yellow

Xenon capsules create a light from an electrical discharge between two electrodes in an environment of metal halide salts, mercury, and Xenon gas hermetically sealed in a quartz capsule. Hella's Xenon capsules provide a blue-white light source that is very close to natural daylight and deliver at least 70% more light at a lower wattage than traditional lamps. Xenon capsules should be used exclusively with Xenon lamps/ballasts.

*All bulbs are DOT certified except yellow capsule. Measurements are in millimeters. Xenon (HID) capsules intended for replacement only. Sold as singles.

The Optilux® Extreme Yellow (XY) Bulbs are able to provide the vehicle owner both fit and function. The Optilux® XY Bulbs are designed to give you better visibility in extreme weather conditions as well as provide you with the look of the GT Series race car lights. The drivers prefer a yellow beam because it provides a better color contrast in rainy, foggy and white out situations. The Optilux® XY Bulbs produce a crisp yellow light from a bulb that is manufactured to the most precise measurements to provide the exact amount of light needed on the road.

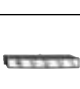

*All XY bulbs are 12V and are packaged in hard plastic shells. Off-road use only.
