VS200, VE200 Series - Bearing Inserts.....	2-43
VS200, VE200 Series - Insert Bearings.....	2-43
VTWS, VTWE Series - Take Up Blocks.....	2-42

WHY BUY BEI

TOP 10 REASONS WHY YOU SHOULD SELL BEI BEARINGS

1. **GREAT QUALITY** - We have sold thousands of BEI bearings and have seen virtually 0% warranty claims.
2. **WARRANTY** - We warrant them for 1 full agricultural season, "hassle-free" - just fill out the form and that's it - no-hassle credit or replacement.
3. **DISCER** - Bearings are all triple lip seals.
4. **TAPER** - Roller bearings are same as those commonly found in popular hub assemblies.
5. **SOURCE** - We buy direct from factory sources worldwide - Taiwan, China, Korea, Europe, Japan.
6. **LABELS** - We buy from the same factories that produce bearings for other manufacturers under their brand label.
7. **COSTS** - We eliminate all of the costs associated with having middle distribution in Canada. We don't have the fancy catalogues or advertising brochures or expensive redistribution warehouses that add to the product price.
8. **OEM** - We sell BEI bearings to a number of OEM manufacturers in Canada. The same factories producing out bearings also sell to OEM manufacturers in the USA.
9. **DISPLAYS** - Three good-looking displays will satisfy about 90% of the bearing orders you will receive over the counter.
10. **PRICING** - Customer may choose to purchase the more economical bearing but still desire a good quality product - BEI gives them that!!!

NON CONTACT SEAL DESIGN

- Narrower than ordinary non-contact type labyrinth with satisfactory seal effectiveness.
- Minimum torque and temperature rise.
- Little noise and vibration.

**Contact your nearest branch for additional sizes and configurations.*

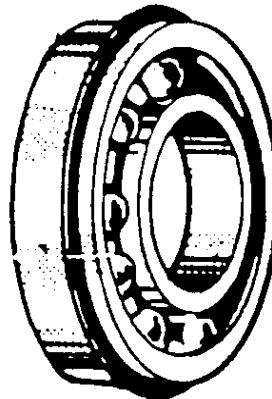

- Non Contact Seal
- Special Internal Clearance
- Meets All Electric Motor Grease Specifications

NOTE: C3 CLEARANCE HAS EXTRA CLEARANCE BETWEEN BALLS & RACEWAYS FOR COOLER RUNNING TEMPERATURE

SKATE BEARINGS

Scooter Bearings

In Line Skate Bearings

Skate Board Bearings

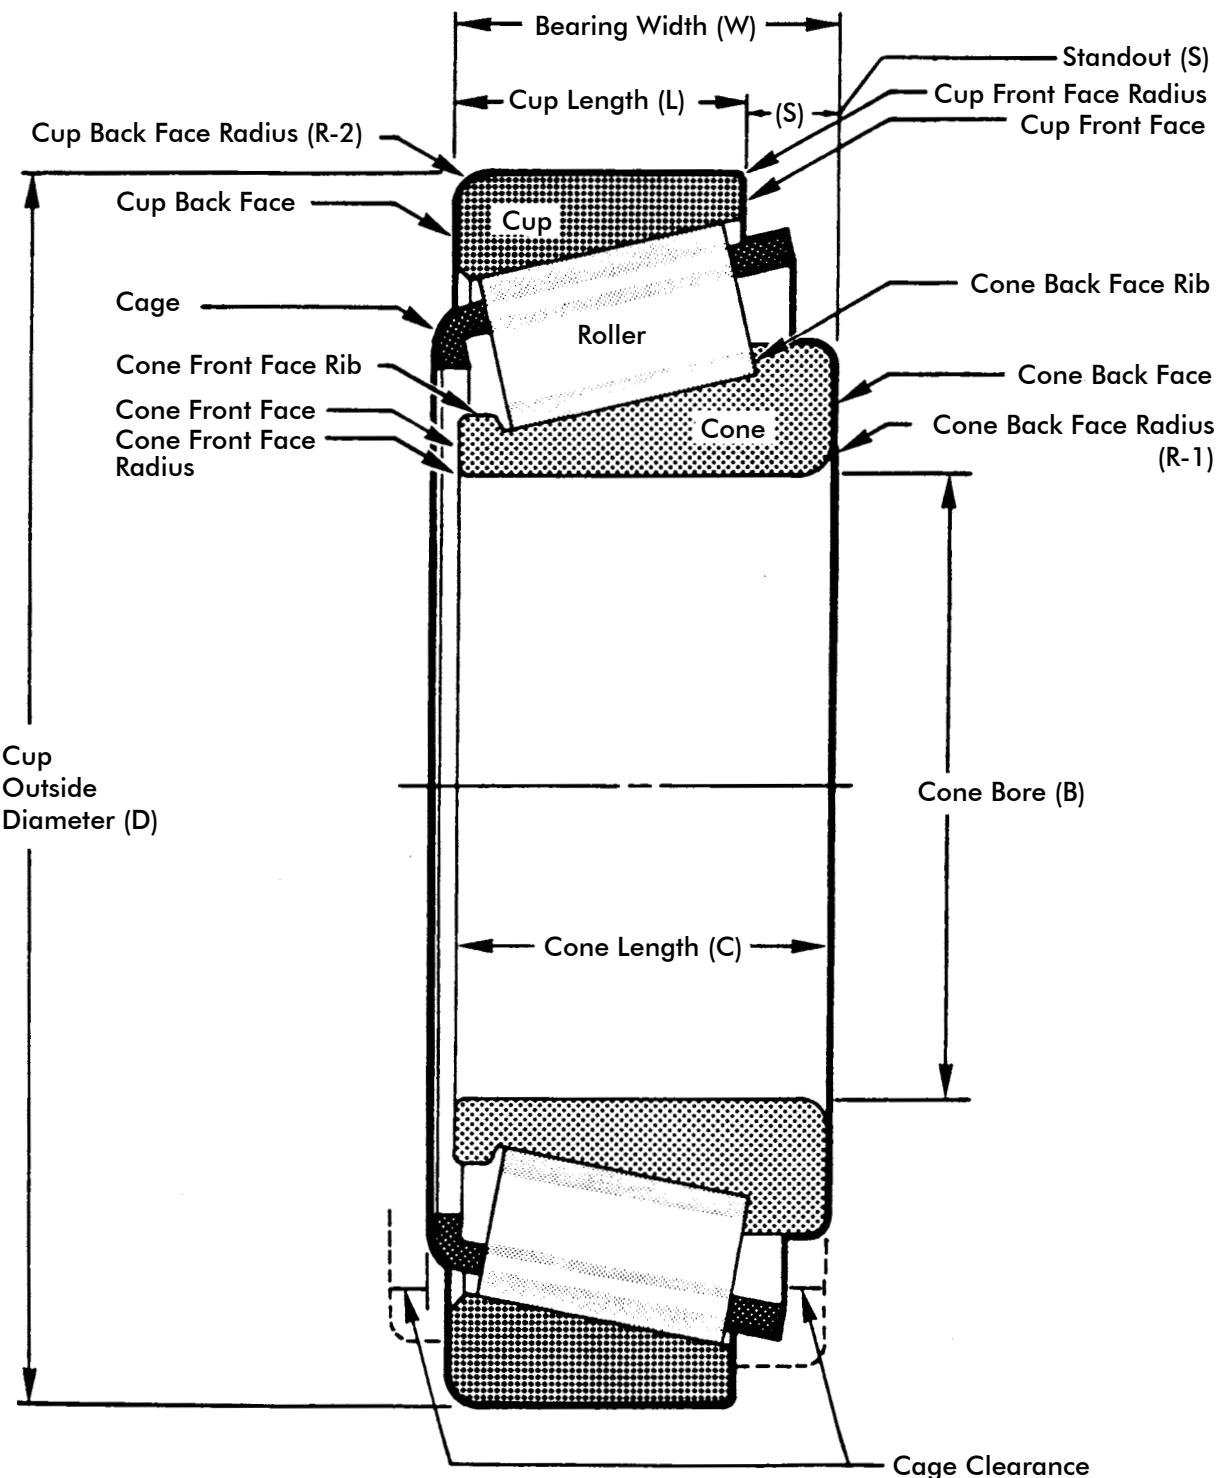

BED SKATE3 - Standard speed ABEC2 tolerance, with durable shields and grease lubrication.

BED SKATE5 - High performance, high speed yet durable, these bearings feature grease lubrication.

BED SKATE7 - High speed, high running accuracy bearings, faster than ABEC5 and still have the convenience of grease lubrication.

PART NO.	QTY.	DESCRIPTION
BED SKATE3	Pkg of 16	Standard Speed
BED SKATE5	Pkg of 16	High Speed
BED SKATE7	Pkg of 16	Super High Speed

Note:

- Tapered sealed cones use tapered standard cups, are individually boxed in factory original boxes.

INCH SERIES TAPER ROLLER BEARINGS

Standard Nomenclature for Tapered Roller Bearings

NOTE: The following is a listing of most popular cups that fit the most popular cones. This chart is for quick reference only and does not mean that these cups or cones will fit or work in your application. When supplying new cups and cones to your customers, and the old used bearings are not available with part numbers, always refer to manufacturers specifications manual or application catalogue prior to installation. For reference purposes, each cup will fit each cone within the series shown.

FORGET**

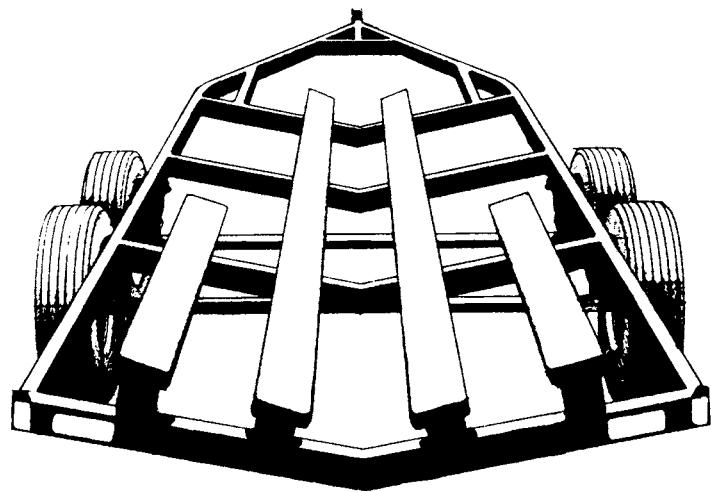

**Check out Section 8 for a
full selection of PTO parts in
both inch & metric sizes...**

TRAILER WHEEL BEARING KIT

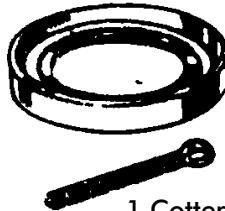

These wheel bearing kits are individually boxed packages, and they contain everything needed to repair or replace the bearings on one wheel. Also included in the kit are detailed instructions, a grease pack and cotter pin.

All of our kits contain original equipment quality bearings and seals. These parts are suitable for a variety of applications including boat, golf cart, horse, snowmobile, utility and camper trailers.

Kit Consists of:

1 Grease Seal
Fits most Wheels

1 Cotter Pin

2 Tapered Roller
Bearing Cups

2 Tapered Roller
Bearing Cones

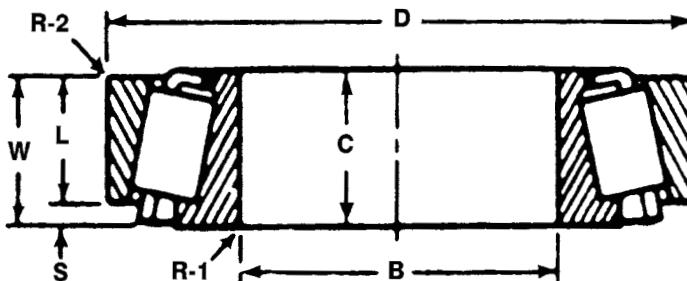

1 Grease
Pouch

* Bearings within the same series are compatible. You cannot mix & match with other series.

200 SERIES NORMAL DUTY BALL BEARING UNITS

All units **factory lubricated** with grease fitting installed for normal service.

Convenient packaging shows interchange numbers for instant selection off-the-shelf.

Nickel Plated Housing available from stock for additional corrosion protection.

Dimensional Interchangeable. Industry standard housing dimensions in pillow blocks, flange blocks, take-up units - cast iron and malleable - 100 Series light duty, 200 Series normal duty and 300 Series medium duty.

Features

- 52100 vacuum degassed steel
- Zone hardened inner
- Honed raceways
- Diamond cup pt. set screws
- 120 degree set screw locking
- Wide inner race
- Outer race anti-rotation pin
- Molded nylon retainer
- Molded lip contact seal
- Additional Flinger
- Solid base housing

Benefits

- Improved fatigue life
- Better clamping force on shaft
- Smoother & quieter operation
- Superior shaft locking
- Balance three point contact
- Stabilizes load over greater surface area
- Prevents creep in the housing
- Minimizes ball wear
- Retains grease effectively
- Excludes foreign matter from entering bearing
- Provides rigidity, sound reduction & vibration

RUBBER BALL BEARING BOOTS

Can be used with snap-together pillow blocks

- Rubber boots can be used in special applications where the application requires a minimum of vibration and noise proof mounting, oil resisting, static conductive, neoprene rubber boots or grommets are used.
- When ordering for a 40 millimeter self aligning ball bearing pillow block application you would order a SP04 pillow block set. Then for a 47 millimeter self aligning ball bearing pillow block application you would order a SP05 pillow block set. And when ordering for a 52 millimeter self aligning ball bearing pillow block application, you would order a SP07 pillow block set.
- The reason for the above is due to the fact that the rubber boot or grommet surrounds the ball bearing and fits in between the base and top strap of the pillow block set.
- Remember that a pillow block set without turned down edges of the top strap, and turned up edges on the base will not work, as the rubber flows out of the unit in use when any thrust is applied.
- The above units have the proper edges on both base and top strap. This is the type of unit, where the base and top strap have the "Snap Together" feature.

SEAL & GREASABLE ECCENTRIC LOCKING COLLAR BEARINGS
SA Series Insert Bearings

- Bearings have round (spherical) outer races
- Bearings have eccentric locking collars
- Bearings are available in sealed or regreasable

Notes:

- Part # SA205-16 refers to sealed bearing
- Part # SA205-16G refers to regreasable bearing
- Please specify if you want sealed or greasable (add suffix "G" to Part # for greasable)
- Grease hole is located on locking collar side of bearing
- Some outer ring widths may vary slightly
- *items are only available in greasable

Notes:

- Above are available in sealed only
- Some outer ring widths may vary slightly

See Section 10 for Alligator Fasteners

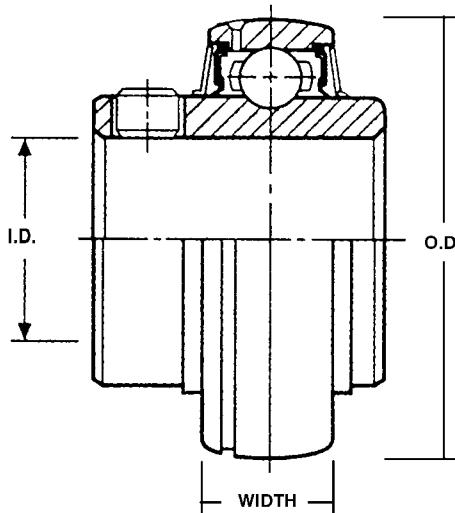

UC 200 SERIES INSERT BEARINGS

- All are regreasable design
- All have flinger shields on outside

The flinger shield rotates with the inner ring and centrifugally force rust and dirt away from the bearing seals

- All have contact type seals
- All are round (spherical) outer race
- All are set screw lock

NO EQUIVALENT

**Check out Section 11 for a wide selection
of Parker Hydraulics**

**G1000KRRB SERIES INSERT BEARINGS**

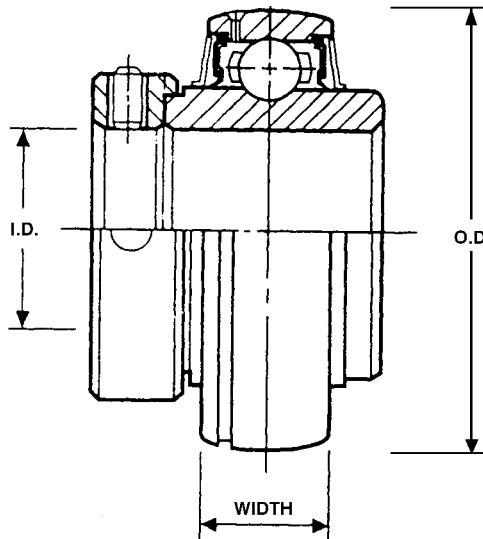

- Regreasable
- Eccentric locking collar
- Flinger shields on outside
- Contact seals on inside
- Round (spherical) outer race
- Extended inner race on both sides

*The flinger shield rotates with the inner race and centrifugally

forces dust and dirt away from the seals.

FLANGE BLOCK HOUSING

- Can be used with SA, SB, UC & G...KRRB Series bearings.
- Housings come with grease fittings.
- Made of high quality cast iron.
- Housings are 200 series standard duty.
- Dimensions are industry standard.

Notes:

- G...KRRB & UC inserts may extend slightly beyond the back side of the flange block. This could be a problem on flush mounted applications.
- Some dimensions may vary slightly.

*On some sizes of G...KRRB the inner ring may extend beyond the back mounting base of the flange housing
*BEI housings can be used with BEI or BED bearings

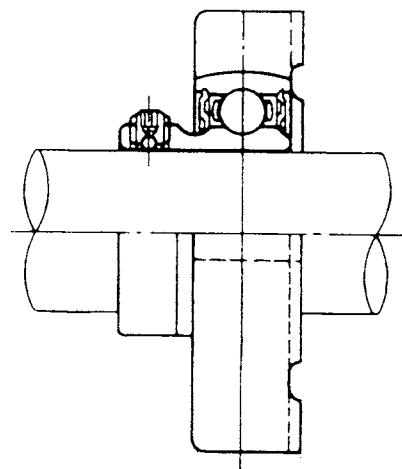

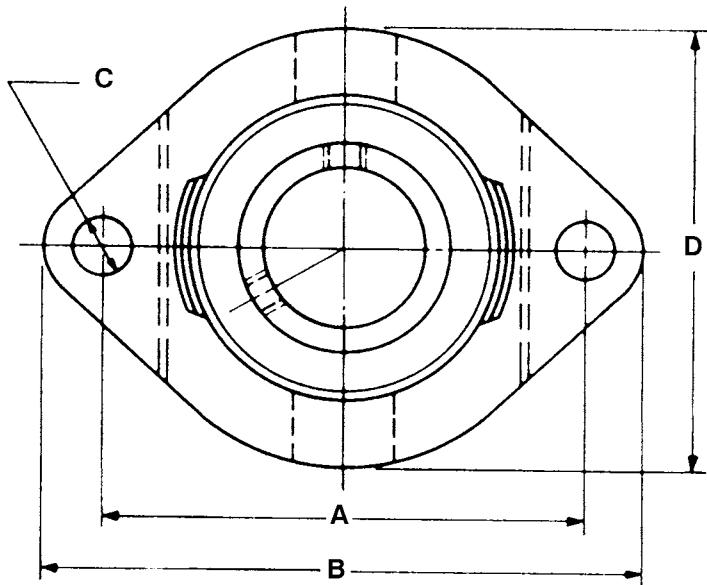

2 BOLT "STUBBY" HOUSING

- Can be used with SA, SB Series bearings.
- Made of high quality cast iron.
- Housings are complete with grease fittings.

*Above flanges are of plain steel (not plated)

PILLOW BLOCK STANDS

Our MPB - Stands are excellent quality parts which are used where speeds are moderate and loads are medium. These are used in place of the expensive Cast Iron or Malleable Iron Pillow Block units, under above conditions. A 40MST, 47MST, 52MST, 62MST or 72MST Flange is required to retain ball bearing when bolted together.

All of these parts are zinc plated.

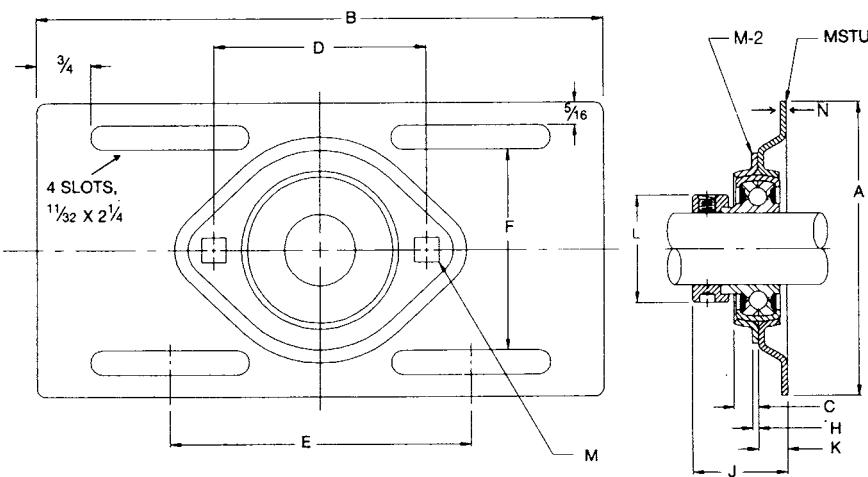

For use with round outer race bearing inserts

UNIT PART NO.	A	B1	C	D	E	MATING FLANGE #
BED 40MPB-STAND	1 3/16"	3 5/8"	4 7/8"	2 11/32"	2 1/2"	BED 40MST
BED 47MPB-STAND	1 5/16"	3 13/16"	5"	2 11/16"	2 13/16"	BED 47MST
BED 52MPB-STAND	1 7/16"	3 3/4"	5 1/4"	2 27/32"	3"	BED 52MST
BED 62MPB-STAND	1 11/16"	4 11/16"	6 1/4"	3 11/32"	3 9/16"	BED 62MST
BED 72MPB-STAND	1 7/8"	5"	6 1/2"	3 23/32"	3 15/16"	BED 72MST

*Must use a mating flange to hold bearing in place.

STAMPED TAKE-UP UNITS

These Zinc plated light duty pressed steel tightening and adjustment units are designed to be used with standard 2-bolt flanges and ball bearings with spherical OD. Two-bolt flanges sold separately.

For use with round outer race bearing inserts

PART NUMBER	A	B	C	D	E	F	H	J	K	L	M	N	RADICAL LOAD RATING	MATING FLANGE NO.

BALL TRANSFERS

Flange Mounted

This all steel column has a two-hole flanged base for easy mounting and is designed for ball-up application only.

Stud Mounted

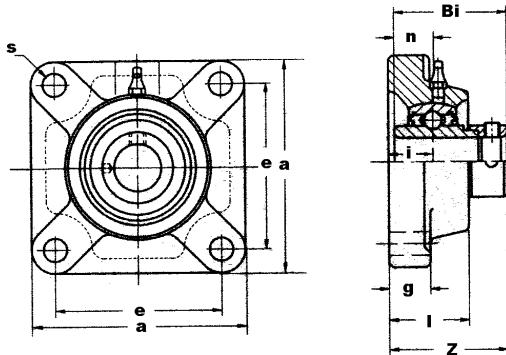

Designed for multiple unit installation, these transfers have a drawn steel housing. The unit is engineered for ball up or ball down mounting.

DEEP FLANGE BLOCK HOUSINGS

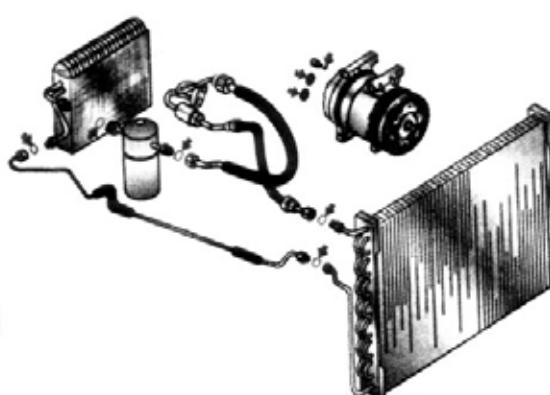

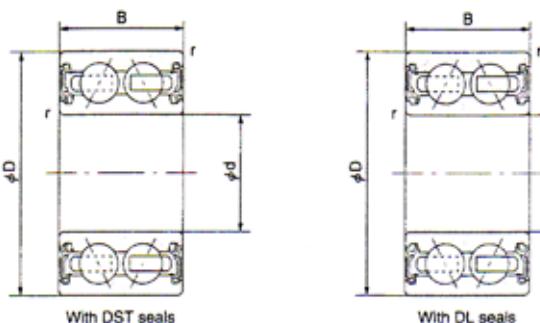

- Can be used with SA, SB, UC & G...KRRB series bearings.
- Housing comes with grease fittings.
- Made of high quality cast iron.
- Ideal for disc bearings because of depth.

BEARING TO FIT CASE-IH DISC HARROW

Round Bore - 1.7650"

PART NO.
BEI ST491A

Fits the following IHC Discs: 37, 45V 56, 48, 61, 60F, 61, 120, 120F, 122, 130, 132, 150, 330, 370, 470, 475, 480, 485, 490, 496, 610, Offset 760

This bearing is very popular with IHC/Case equipment and we recommend all distributors promote this new bearing.

CS204 SWATHER ROLL BEARING

Includes plastic housing and bearing

BED 553

**See Section 17 for a wide selection of
Tines and Teeth**

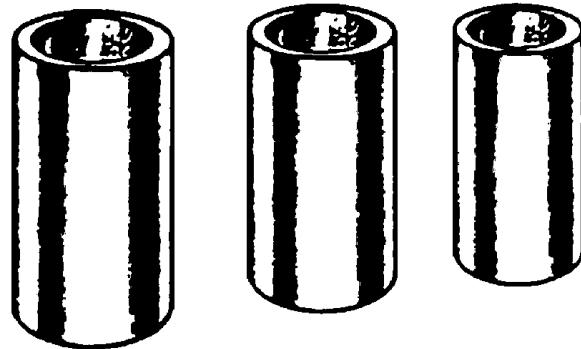

BRONZE BUSHINGS OIL IMPREGNATED

Lubrication Proper lubrication is essential for the bushing, and we use the highest quality oils available. Our standard lubricant has an effective operating range from +10°F to +175°F.

Supplemental Lubrication Additional lubrication can be provided through the use of oil soaked felts, wicks, etc., or by periodic oiling. A unique advantage of the bushing is that it does not require any grooving or holes to distribute the oil across the bushing surfaces. The bushing distributes oil evenly across the bushing face due to the microscopic pores in the material.

Storage of Bushing Bushings must be stored in non-absorbing containers. Do not store in paper or cloth containers. Do not store in cardboard boxes! The best containers are made of plastic or metal.

De-Oiling To remove oil from a bushing, immerse it in a solvent for 12 hours. An aromatic solvent is recommended. Chlorinated solvents should be avoided, as they can initiate corrosion within the pores of the material. After soaking in solvent, the bushings should air dry until the absorbed solvent is evaporated.

Re-Oiling The most efficient method of impregnation is by the vacuum process. However, this process is typically available only to bushing manufacturers. Re-oiling can also be accomplished by immersing the bushing in oil heated to 150-175°F. This method will result in a 90% saturation of the bushing material.

OIL SEALS

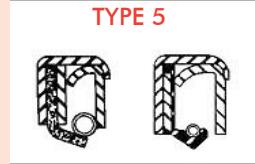

Spring Loaded General Purpose Design

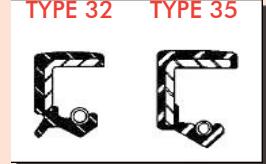

- Types 41, 45, 47, and 48 are the 4 basic spring loaded seals offered by National.
- They are the preferred industrial design and are used extensively in the National Zero Duplication Plus program.

- 41 & 47 Types are dual lip designs for extra contaminant exclusion.
- 41 & 45 Types with inner case designs are recommended for bore dimensions over 3 1/2"

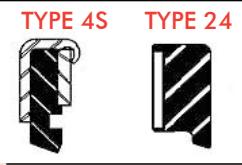

- Standard single lip design found in automotive and industrial applications.
- Single lip design is used in conjunction with Teflon seal lips.

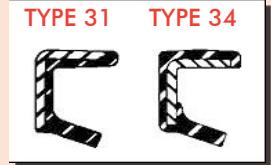

- Type 32 and 35 are recommended in applications where contact between dissimilar metals must be avoided. *
- Type 32 and 35 are designs used widely in metric seal applications.

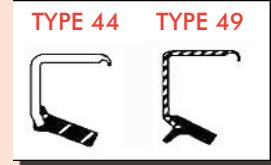

Springless Seals General Purpose Design

- Type 4S used for grease retention on slow speed applications
- Type 24 used for small machinery, limited space, low sealing friction.

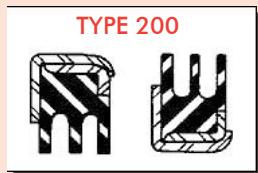

- Type 31 utilizes metal case to reinforce mold formed bonded sealing member.
- Type 34 offers encased design to avoid contact between dissimilar metals. *

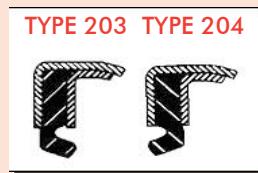

- Type 44 & 49 series often used in combination with self sealed bearings in auxiliary with spring loaded design.

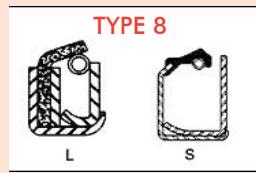

Variations of Basic Designs

- Special design for slow shaft speeds that require positive
- Designed primarily for disc harrows & other ag equipment.

- 203 designed for lubricant retention.
- 204 is an exclusive design.

- External lip design.
- Slow speed applications
- Seals at bore periphery.
- Good for stationary shafts where fluid sealed is grease or viscous oil.

- Dual lip.
- Rubber on toe design.
- Auxiliary lip serves to exclude foreign matter.

- Rubber on toe design.
- Expands and seals against bottom shoulder of wheel shaft bore.
- Provides 100% positive bore sealing.
