## BROWNING V DRIVES

**World's Largest Selection of V-Belts, Sheaves and Bushings...  
Now with B5V, the most significant advance in belt drives since the V-Groove.**

Browning offers the most extensive V-drive line available anywhere, which means maximum economy, versatility and prompt availability for your every application...truly the right drive every time!

With the introduction of the revolutionary B5V, Browning has brought 1990's technology to the V-drive design. B5V packs into only 120 components what previously required some 500 different inventory items. And, you can mix and match B5V with many present drive components for maximum flexibility.

LVP Variable Speed Sheave

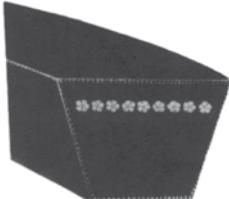

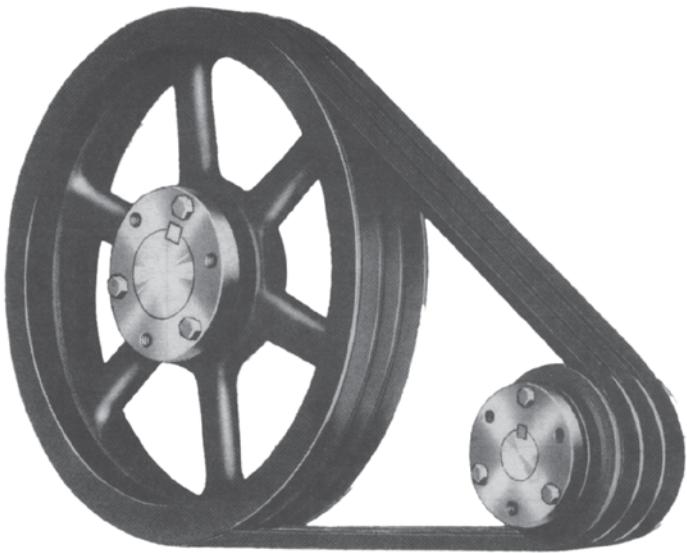

Multiple Sheave

MVP Variable Speed Sheave

358 Sheave

Super Gripbelt

Premium Griptwist

When you specify Browning, you select from the broadest range of V-drive ratios and centres in the world - more than double the selection available from any other source.

- Over 2100 stock sizes in multiple groove sheaves, far more than any other manufacturer.
- Full range of sizes in two bushing types: the popular Browning split taper and the QD. Choose the replaceable bushing that best suits the application - no other manufacturer offers this choice.
- Variable speed sheaves through 750 HP, precision balanced to provide smooth vibration-free performance.
- "358" sheaves stocked in a range of fixed and variable pitch sizes.
- All types of belting - classical, "358", Gearbelt, Poly-V, Gripnotch and premium Griptwist belts.
- Automated computer software program, BROWNING/EDGE, generates V-drive selections in seconds.

**Westward Parts has available a full line of V Drives.  
Please contact your nearest branch for details.**

*Classical and "358" Gripbelt Sheaves are available in either of two bushing types: Split Taper or QD.*

## GRIPBELT SHEAVES

Westward Parts stocks a complete line of Gripbelt Sheaves and Variable Pitch Sheaves

### Gripbelt Sheaves Feature:

- Cast iron construction.
- Accept split taper bushings.
- Accurately machined.
- Statically balanced.
- Easy to mount and remove.
- Clamp fit on shaft.
- TB sheaves have combination groove that accepts both A & B Section v-belts.
- TB sheaves accept the P1, P2 & Q1 Browning bushing with a bore range from:
  - 1/2" - 1 3/4" on the P1 bushing
  - 3/4" - 1 3/4" on the P2 bushing
  - 3/4" - 2 11/16" on the Q1 bushing
- TC sheaves accept the Q1 bushing.
- All sheaves are key to key drive for maximum horsepower capability.

# Sheaves

Westward Parts also has available a full line of both QD and taper lok style sheaves. Contact your nearest branch for price & availability.

See Catalogue Section 5 for a full range  
selection of C Section V-Belts.

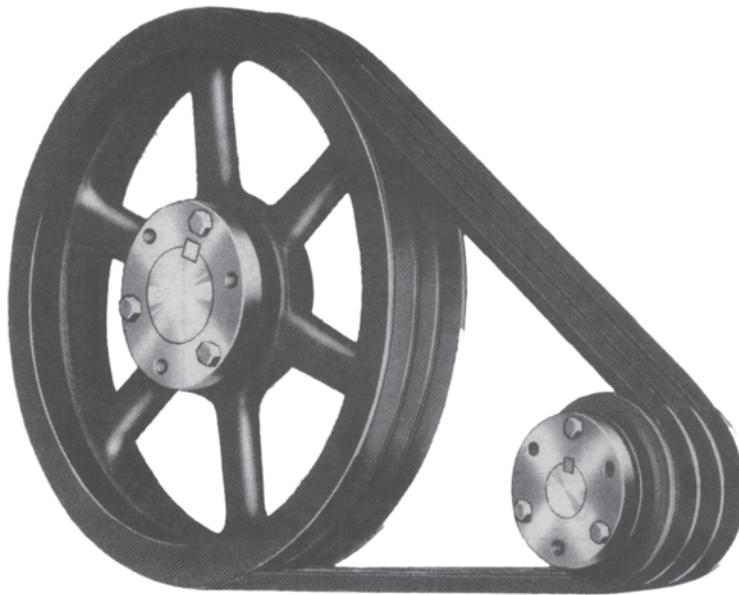

## BROWNING "358" GRIPBELT DRIVES

### More Horsepower in Less Space!

**BROWNING "358" GRIPBELT DRIVES** combine the improved performance characteristics of today's higher quality synthetic materials with a more compact cross-section to provide an efficient mode of power transmission. Because of the significantly higher capacity of these belts, drives are designed with shorter center distances and smaller sheaves. Overall drive dimensions are reduced by as much as 40%; weight savings of up to 25% are achievable. All material savings are reflected in the lower cost of the drives.

Browning "358" Gripbelt Drives are furnished in only three cross-sections to cover the entire range of drive requirements. This results in a substantial reduction of both belt and sheave inventories.

The belt cross-section approaches a true "V" as shown. The groove walls of the sheaves provide more equalized support to the tension members since there is more side wall contact area. These factors, plus the tougher, more resilient belt materials, provide V-belts with exceptional transmission capacity.

1. The "3V" belt measures  $\frac{3}{8}$ " across the top and  $\frac{5}{16}$ " in thickness and is available in lengths from 25" through 140".
2. The "5V" belt measures  $\frac{5}{8}$ " across the top and  $\frac{17}{32}$ " in thickness and is available in lengths from 50" through 255".
3. The "8V" belt measures 1" across the top and  $\frac{7}{8}$ " in thickness and is available in lengths from 100" through 450".

### "358" Gripbelt Sheaves

## SNUGULATOR TIGHTENERS FOR ROLLER CHAINS

Using the Snugulator in the above application will make your roller chain last longer and run cooler and quieter.

- Long lasting
- Quiet
- Increases chain life
- Performs smoothly on both worn and new chain
- Superior replacement for all types of equipment
- Snugulators may also be used for belt application utilizing the same guidelines
- Snugulator Tighteners will work in most gear box oil

If your application is in a load bearing area, a wrap of more than 25 degrees, surging of chains or close to the sprocket use the IdleMaster Tightener. For more information refer to the Snugulator and IdleMaster Problem Solving Handbook.

### Plain with Bolt Hole

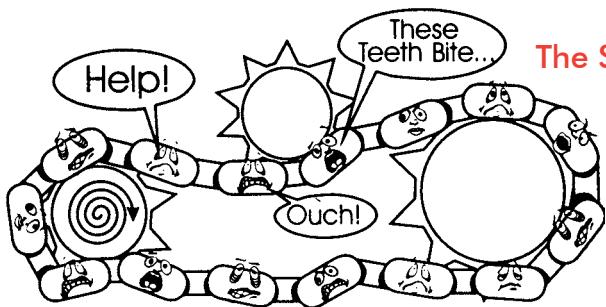

Perfect for belts and roller chains with short runs where a bolt can be used as a mounting device. Choose a tightener that will protrude a minimum of  $\frac{1}{8}$ " beyond each side of the chain.

PART NO.	ROLLER CHAIN SIZE	BOLT HOLE MOUNTING SIZE	W	OD	D
PTP 2500BD3	100 Pitch and smaller	$\frac{1}{2}" - \frac{5}{8}" - \frac{3}{4}"$	$2\frac{1}{8}"$	$3\frac{1}{2}"$	$\frac{1}{8}"$ one side
PTP 2550BE3	80 Pitch and smaller	$\frac{1}{2}" - \frac{5}{8}" - \frac{3}{4}"$	$1\frac{3}{8}"$	$3\frac{1}{2}"$	$\frac{1}{8}"$ one side
PTP 2755CB2	60 Pitch and smaller	$\frac{3}{8}" - \frac{1}{2}" - \frac{5}{8}"$	$1"$	$2\frac{3}{4}"$	$\frac{1}{16}"$ both sides

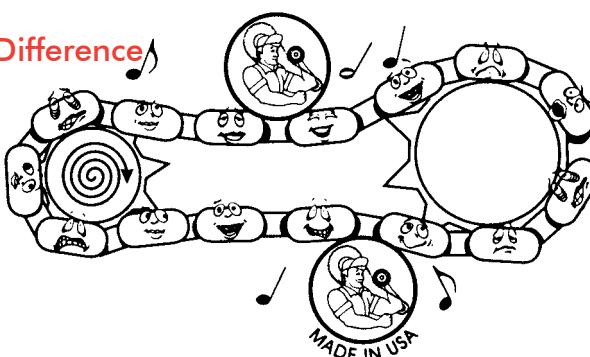

### Flanged with Bolt Hole

Use where a bolt is needed for mounting. Choose this design when durable steel-flanged edges are needed to hold longer belts and chains in place.

PART NO.	ROLLER CHAIN SIZE	BOLT HOLE MOUNTING SIZE	W	OD	D	FD	FW
PTP 2500FBD3	100 Pitch and smaller	$\frac{1}{2}" - \frac{5}{8}" - \frac{3}{4}"$	$2\frac{1}{8}"$	$3\frac{1}{2}"$	$\frac{1}{16}"$	$4"$	$2\frac{1}{2}"$
PTP 2550FBE3	80 Pitch and smaller	$\frac{1}{2}" - \frac{5}{8}" - \frac{3}{4}"$	$1\frac{3}{8}"$	$3\frac{1}{2}"$	$\frac{1}{16}"$	$4"$	$1\frac{3}{4}"$
PTP 2755FCB2	60 Pitch and smaller	$\frac{3}{8}" - \frac{1}{2}" - \frac{5}{8}"$	$1"$	$2\frac{3}{4}"$	$\frac{1}{8}"$	$3\frac{1}{4}"$	$1\frac{5}{16}"$

These all-new IdleMaster Tighteners from Black Ace are designed for use with both roller chains and belts. Their design allows a wide range of applications, including the tightest spots...extending the life of your roller chains and belts.

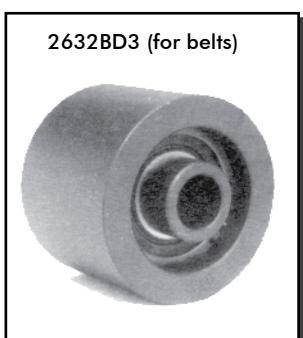

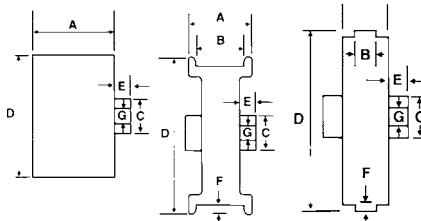

### IdleMaster direct replacements for:

pitch 40 - 17 tooth	2641BE
pitch 50 - 15 tooth	2651BE
pitch 60 - 13 tooth	2661 BE
pitch 80 - 12 tooth	2681BE

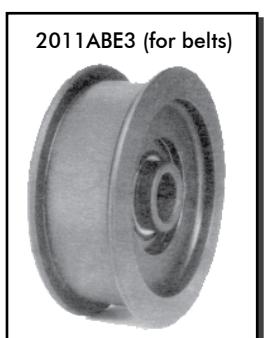

- Interchangeable with most idler sprockets.
- Easy to install.
- Ideal for high-pressure-point areas.
- Precision machined of heavy-duty steel to last much longer!
- Perform smoothly on both worn and new chains.
- Can be stacked for double-chain and wide belt applications.
- Bushings to accomodate 3 bolt hole sizes.
- Superior replacements for all types of equipment.

## ROLLER ASSEMBLIES

For Case-IH & New Holland Combines

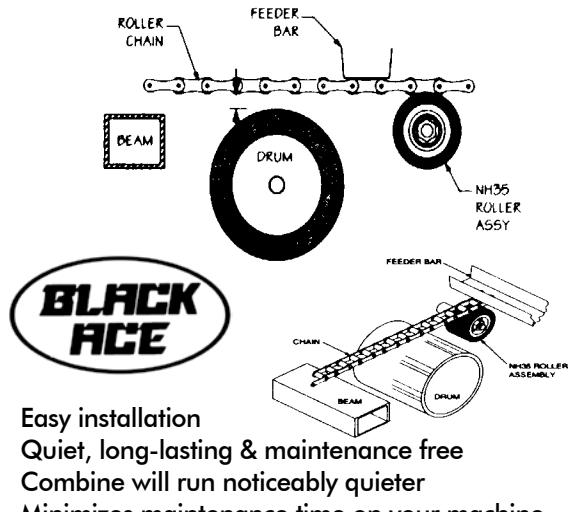

**Reduces Noise & Wear!**

Black Ace's IH35 roller assembly makes your combine noticeably quieter by keeping feeder chains quiet. It reduces feeder chain wear and extends chain life.

The assembly includes a double bearing roller, bolt with nut, and mounting shaft.

PART NO.	FOR USE ON
PTP IH35K37	CASE-IH 60 Series Combines
PTP IH35K47	CASE-IH 80 Series Combines
PTP IH35	CASE-IH All Axial Flow Combines (without shaft)
PTP IH35K473	CASE-IH 80 Series Combines with 3 Strand Feeder Chains
PTP NH35	Most NEW HOLLAND TR Series 70, 75, 85, 86, 95, 96 & 97
PTP BGAS/351	Replacement Bearing

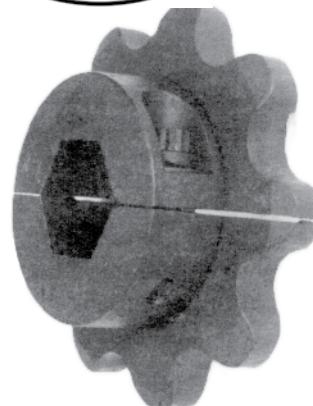

- Easy installation
- Quiet, long-lasting & maintenance free
- Combine will run noticeably quieter
- Minimizes maintenance time on your machine
- Reduces wear on feeder bars and feeder bar slides by keeping chain off the slides
- Reduces wear on roller chain and chain wear plate

## FEEDER CHAIN DRIVE SPROCKETS (FOR MOST COMBINES)

Black Ace split sprockets are precision manufactured of heat-treated steel for long life and less down time. They maintain accurate pitch and perfect timing, greatly reducing chain wear; grade 8 bolts secure them tightly to the hex shaft. Forget about the hassle time and cost of pulling out the hex shaft to change sprockets. Super-easy installation!

PART NO.	OEM NO.	FOR USE ON	DESCRIPTION
PTP H5509NHIH	1970248C1	Case-IH	9 teeth, 1 1/2" hex bore
PTP H55010MHJD	H118583	John Deere	10 teeth, 1 3/4" hex bore
PTP H55013NHG	71357768	Gleaner	13 teeth, 1 1/2" hex bore
PTP H55012MHNH	766380	New Holland	12 teeth, 1 3/4" hex bore
PTP H55012MHNHO			Split Ring Outside Drive Sprocket

**See Section 5 for a Great Selection of Roller Chains!**

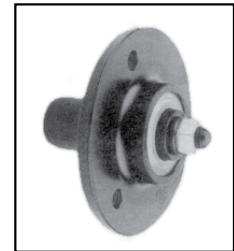

## BEARING ASSEMBLIES

For Case-IH Rotary Combines

**BLACK ACE BEARING HOLDERS** easily upgrade the wooden block bearings on grain-pan augers - without replacing the block or removing the auger. The precision-machined steel shaft fits into the end of the auger, making it run true and turn more easily for long trouble-free life.

PART NO.	OEM NO.
PTP IH52	193414C2

## ELEVATOR CHAIN SPROCKETS (FOR MOST COMBINES)

**BLACK ACE HEAT-TREATED STEEL SPLIT SPROCKETS** make replacement of tank and return elevator sprockets faster and easier. They can be installed without pulling out the shaft and disassembling other component parts. They are secured tightly on the shaft.

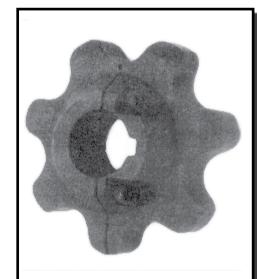

### Case-IH

PART NO.	OEM NO.	DESCRIPTION
PTP H5507A5	168683C1	7 teeth, 1" bore
PTP H5507B6	1319176C1	7 teeth, 1 1/4" bore
PTP H5507Q6	1302200C1	7 teeth, 1 1/8" bore
PTP H5509B6	1317192C1	9 teeth, 1 1/4" bore
PTP H5509C6	143960A1	9 teeth, 1 3/8" bore

### John Deere

PART NO.	OEM NO.	DESCRIPTION
PTP H5508A6	H103576	8 teeth, 1" bore
PTP H5508B6	H91334	8 teeth, 1 1/4" bore

Black Ace split sprockets may work on other makes and models of combines that require the same number of teeth and bore size shown.

## IDLER ROLLERS

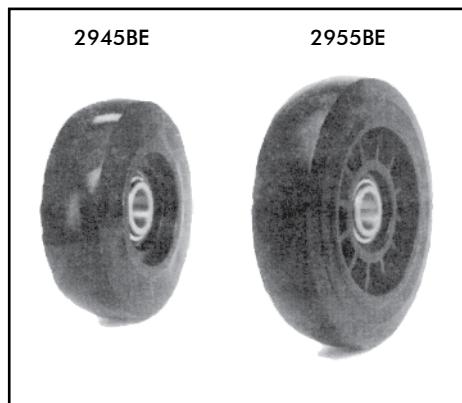

### Features...

- High tech urethane material & high quality greaseless bearing assembly with superior bonding of all materials.
- 4" or 5" diameter x 1" wide.
- 5/8" bolt mounting (with 1/2" bushing).
- Durable construction, made to take shock, light to moderate loads.

### Benefits...

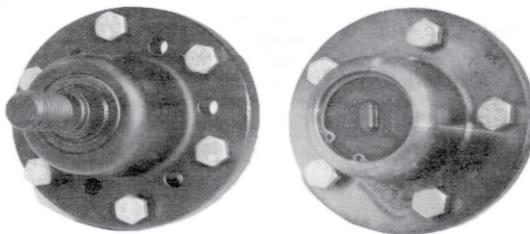

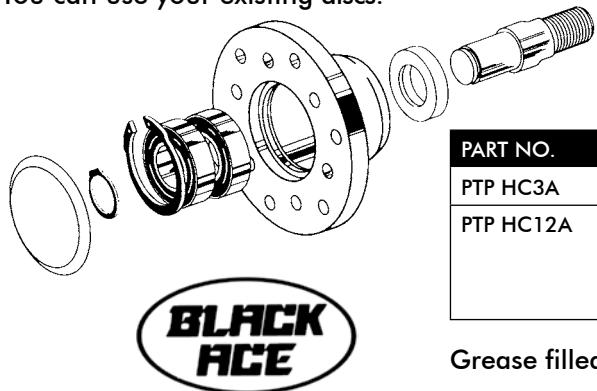

- Quiet, long-lasting and maintenance free.
- Extremely wear resistant - Reduces downtime & replacement parts costs.
- Light weight, inexpensive and cost effective.
- Versatile - one roller for many applications.

PART NO.	DIAMETER
PTP 2945BE	4"
PTP 2955BE	5"

## HUBS FOR MARKERS & COULTERS

Precision-machined steel Black Ace cultivator coulter hubs feature easy installation and long, maintenance-free life. Two sealed easy-to-replace 6203 bearings are included, along with dust cap, bolts and self-locking nuts. You can use your existing discs.

PART NO.	DESCRIPTION	FITS	INCLUDES
PTP HC3A	Coulter Hub	5 5/16" holes, 3" bolt-hole circles	5 5/16" bolts
PTP HC12A	Marker Hub	Fit hubs with 5/8" bolt holes Fits Case-IH (90850C92) & John Deere (AA27928) 6-hole, 3" bolt hole circle 6-hole, 2 1/2" bolt hole circle	6 1/4" bolts

Grease filled auxiliary seals with replaceable 6203 bearings.

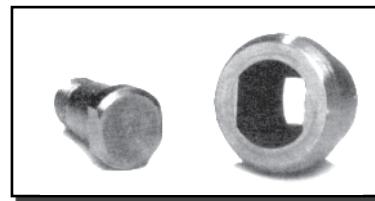

## CASE-IH SOCKET TOOL

The IHS Socket Tool for your Case-IH disc coulters.

Save your bolts • Speed up your repairs • Eliminate injury

- For 1/2" drive.
- Made from high quality steel in the U.S.A.
- Fits grain drills and seeder models 610, 620, 6200 and air drill model 8600.

PART NO.

PTP IH5

### ABOUT THE COMPANY BEHIND BLACK ACE PARTS...

A comprehensive line of Black Ace Quality Parts and other specialized parts are produced and manufactured by TEROG Manufacturing company. Based in Stephen, MB, this family-owned business has over a quarter century of experience in developing innovative, durable parts that meet and often exceed the needs of todays equipment. Black Ace Parts are designed for easy installation, low maintenance, heavy-duty strength and adaptability. Many Black Ace Parts are interchangeable, working in several applications, minimizing costly downtime and improving performance on all types of equipment.

## BLACK ACE TROUBLESHOOTING GUIDE

### PROBLEM: The roller chain tightens and loosens to an excessive degree.

**POSSIBLE CAUSE:** The run-out of drive sprockets causes the chain to lop. Since shafts are usually undersized (from .001 to .005 inch) and bores are generally oversized, the sprocket may come slightly off-center when the set screws are tightened. Even a small amount of run-out causes chain lop.

**SOLUTION:** Use the Snugulator Tightener to absorb the tightening and loosening of the chain. Also, try a tighter fit or a taper-lock hub.

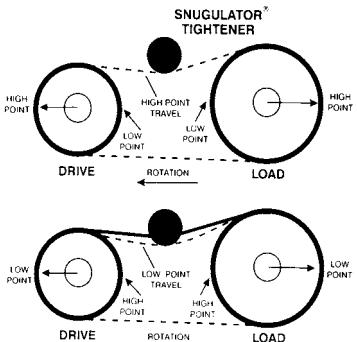

**POSSIBLE CAUSE:** The sprocket shaft is slightly bent, causing the sprocket to move in all directions.

**SOLUTION:** The Snugulator Tightener will help to some degree, but you should also replace the shaft.

**POSSIBLE CAUSE:** Accumulated run-out causes large variations in the length of chain needed on the drive. The greater the number of sprockets in contact with the chain drive, the greater the chain movement. A rhythm develops as the chain is running.

**SOLUTION:** When installed in the correct locations, the Snugulator Tightener will take up much of the variation; it may create a substantial improvement in performance. On a long drive with several sprockets, it's important to keep sprocket run-out to a minimum. Even very slight run-out creates noticeable movement on a chain tightener.

Illustration shows run out of a typical drive and load sprocket. At high points, to the outside, chain is tight and at low points, chain is loose. Snugulator tightener absorbs the run-out, keeping the roller chain tensioned to all points, eliminating flexing and noise.

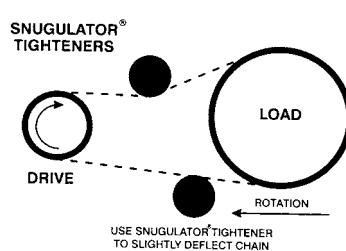

### PROBLEM: The chain is whipping on the power side, making a vibrating, snapping sound.

**POSSIBLE CAUSE:** The chain or sprocket is worn, causing chain grouping. When chain pitch is greater than the pitch of the sprocket tooth, some chain rollers fail to come in contact with the bottom of the tooth. As this section of chain comes off the load sprocket, the sudden excess of chain causes a momentary slack. The drive sprocket takes it up, quickly and forcibly, creating a snap or jerk accompanied by noise, vibration and undue stress on the entire train.

This condition can also occur on new chain and sprockets when the load is on a large-diameter sprocket. The tolerance built into both sprocket and chain make it difficult to match them with great precision. This is why sprockets must be slightly undersized to accept the new chain. Slight whipping will begin as soon as the chain's pitch increases due to normal wear.

**SOLUTION:** Position a Snugulator Tightener slightly deflecting the chain as it comes off the load sprocket. (This works with both new and worn chain.) Replace worn chain. Excessive chain wear may cause chain links to group up on the sprocket.

### PROBLEM: The roller chain is getting hot.

**POSSIBLE CAUSE:** The chain may be moving too fast.

**SOLUTION:** Lubricate the chain to reduce friction. Substitute chain with a multiple smaller pitch.

**POSSIBLE CAUSE:** The load is too heavy for the pitch.

**SOLUTION:** Use a heavier chain or multiple chains of the same pitch. Install Snugulator or IdleMaster Tighteners.

### PROBLEM: Chain and/or sprockets are showing rapid excessive wear.

Sprockets and chain do wear, even under the most ideal conditions. But this wear can become excessive due to several possible factors: • Heat • Sprocket run-out • Incorrect match of pitch between sprockets and roller chain • Roller spin • Environmental factors • Load • Quality of the parts • Excessive flexing

**POSSIBLE CAUSE:** Roller chain is flexing and jumping, causing overall vibration.

**SOLUTION:** Use Snugulator and/or IdleMaster Tighteners as shown on the installation diagrams.

**POSSIBLE CAUSE:** Check chain and sprocket wear.

**SOLUTION:** If worn, replace both.

**POSSIBLE CAUSE:** Check sprockets alignment.

**SOLUTION:** Align sprockets with a straight-edge.

**POSSIBLE CAUSE:** Inspect the chain assembly for excessive roller wear, increasing chain pitch.

**SOLUTION:** Use Snugulator and/or IdleMaster Tighteners.

A high degree of roller spin may also cause chain to wear. When sprocket idlers are used as tighteners, rollers often spin as sprockets engage and disengage the chain. Often overlooked, this condition becomes more noticeable as chain wears.

Wear results when the links flex to conform with the sprocket. While a certain amount of wear is normal, an excessive amount is likely to be caused by whipping and vibrating on the slack side. The Snugulator Tightener can be used to dampen the whipping, flexing and vibration; or use the IdleMaster Tightener in high-stress areas. Neither tightener is influenced by chain wear; both reduce roller spin.

This attractive floor-standing display uses little space and offers easy self-serve appeal!

## BROWNING BUSHINGS

**Split Taper, QD and Taper Bore Designs**  
**The Broadest Range of Bushing Systems from a Single Source**

### Browning Split Taper Bushings

- Made of tough malleable iron - virtually indestructable.
- Keyed to both shaft and hub - external key provides positive drive with no torque on the capscrews.
- Highest torque carrying capacity.
- Double split barrel assures true concentricity - grips the shaft with positive clamp fit.
- Standard sizes -  $\frac{3}{8}$ " - 10" bore sizes.
- Metric sizes - 10 mm - 95 mm bore sizes.
- Spline bore -  $\frac{5}{8}$ " - 1  $\frac{3}{8}$ ", 6B & 10B, 10 & 21 involute.
- For use with and interchangeable in the full range of Browning sheaves, sprockets, gears, pulls, couplings and hubs.

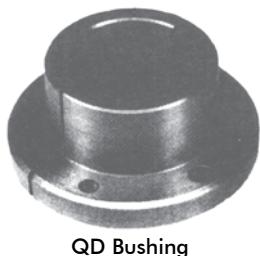

Along with the proven split taper bushing, Browning offers the QD and taper bore bushing systems.

**No other manufacturer gives you this broad selection!**

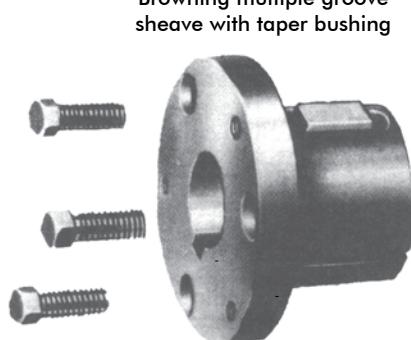

Depending on your drive requirements, select from any of these bushing systems to obtain the most effective combination of components, or choose your own preferred bushing type.

### Browning QD Bushings

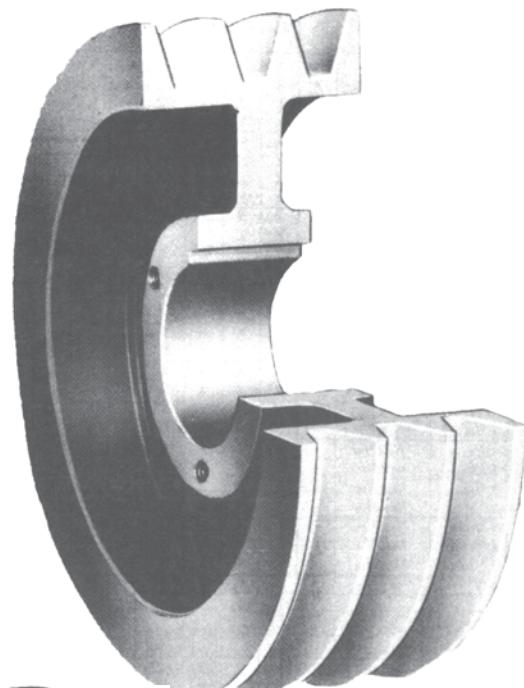

- Standard sizes -  $\frac{1}{2}$ " - 7" bore range.
- Metric sizes - 24 mm - 100 mm bore range
- For use with Browning sheaves, sprockets and pulleys; fully interchangeable with competitive QD bushings.

QD Bushing

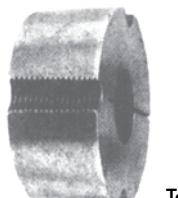

Browning multiple groove sheave with taper bushing

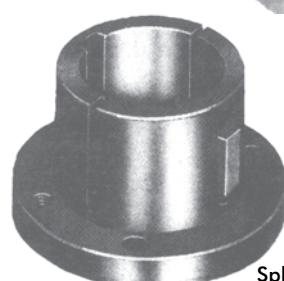

### Browning Taper Bore Bushings

- Standard sizes -  $\frac{1}{2}$ " - 10" bore range
- For use with Browning sprockets

Taper Bore Bushing

## BROWNING IDLER BUSHINGS

Browning Idler Bushings provide idlers in the following products:

Furnished complete with ball bearings,

capscrews, stud bolts, and nuts.

Available for H, P1, Q1 & R1 bore items.

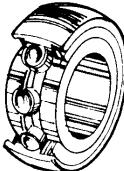

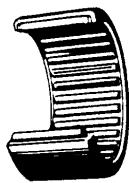

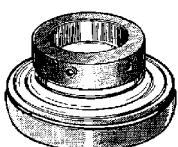

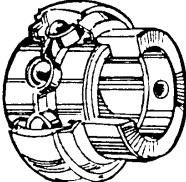

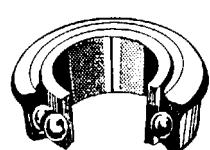

- Sheaves - FHP, Multiple, Poly-V & 358
- Gearbelt Pulleys
- Gears
- Hardened & Standard Sprockets - Single, Double & Triple

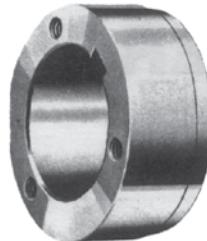

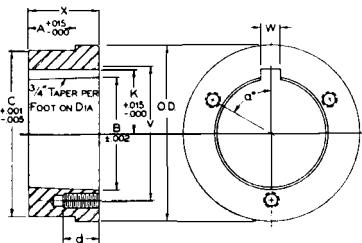

NOTE: Mount stud bolt in either direction.

## BROWNING VARIABLE SPEED DRIVES

For changing speed frequently, rapidly and efficiently.

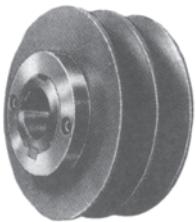

**Browning offers one of the world's most complete selections of in-stock variable speed drives including variable pitch sheaves through 750 HP.**

Sheaves for Browning variable speed drives are available in finished bore or bushing types, for use with exclusive split taper design or QD bushings. They're offered in Classical (A-B, C & D), "358" narrow groove, wide range and fractional horsepower types. MVP sheaves are dynamically-balanced to ensure smooth, vibration-free performance. Select from:

- **VL and VM single groove sheaves**, pitch diameter range 1.6 - 4.7", for light duty applications up to 5 HP.
- **VP single and double groove sheaves**, pitch diameter range 3.4 - 7.0", designed for heavier duty service up to 25 HP.
- **Spring-loaded sheaves**, pitch diameter range 1.4 - 5.8", for use with standard fixed pitch sheaves and adjustable motor base; or with *manually controlled* sheaves for a wider range of speeds.
- **LVP single and double groove sheaves**, pitch diameter range 3.4 - 7.0", for heavier duty drives up to 25 HP.
- **MVP multiple groove sheaves** (up to 10 grooves available), pitch diameter range 3.4 - 17.2", for multiple belt drives up to 750 HP.

Choose also from a full range of fixed pitch and companion sheaves, V-belts, adjustable motor bases, motors and drivers, to perform almost any power transmission service.

Die Cast Pulleys...For Light Duty Applications

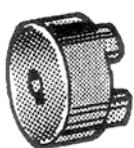

**DIE CAST PULLEYS AND HARDWARE DISPLAY BOARD****Assortment Includes:**

- 56 of the most popular die cast aluminum sheaves
- 6 of the most popular cast variable speed sheaves
- 18 of the most popular jaw type coupling halves and inserts
- 6 of the most popular mandrels
- Attractive display board 36" x 48"

PTP 4850	General Purpose Grinder Mandrel 5/8"	4850	55498

## MANDRELS

### Stub Mandrel

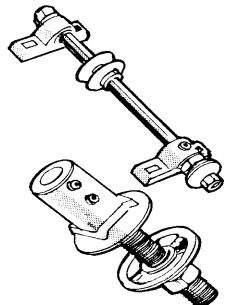

Die cast zinc with cast in  $\frac{1}{2}$ " diameter threaded steel shaft, complete with adjusting nut, flange, and two set screws.

PART NO.	DESCRIPTION
PTP 4860	To fit $\frac{1}{2}$ " diameter motor shaft
PTP 4870	To fit $\frac{5}{8}$ " diameter motor shaft

### General Purpose Saw Mandrels

Zinc die case, with oilless bronze bushings, complete with 2" SINGLE GROOVE V PULLEY. Painted shaft bearings. Accurately machined 12", steel shaft and flanges.

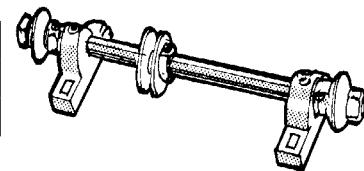

PART NO.	DESCRIPTION
PTP 4800	Turned down at one end to $\frac{1}{2}$ ". Takes saw with $\frac{1}{2}$ " bore.
PTP 4810	Takes saw with $\frac{5}{8}$ " bore.

### General Purpose Grinder Mandrels

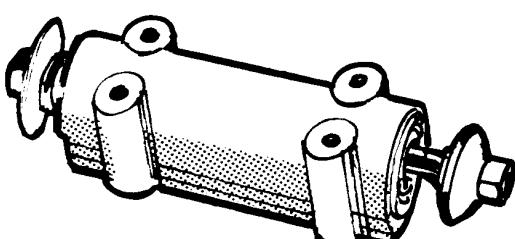

Zinc die cast, with oilless bronze bushings, complete with 2" SINGLE GROOVE V PULLEY. Painted shaft bearings. Accurately machined 14",  $\frac{5}{8}$ " diameter Steel Shaft and Flanges. Right hand thread on one end; left hand thread on other end. A sturdy and useful mandrel allowing an operation on each end without changing.

PART NO.	DESCRIPTION
PTP 4840	Turned down at both ends to $\frac{1}{2}$ " diameter. Takes grinder, buff, etc. with $\frac{1}{2}$ " bore.
PTP 4850	Takes grinder, buff, etc. with $\frac{5}{8}$ " bore.

### Heavy Duty Mandrels

Precision Ball Bearing Mandrels for Heavy Duty Continuous Service. The mandrels are of modern design throughout and combine quality with the most contemporary appearance. Particular attention should be paid to the following features:

- Sealed Ball Bearings. No greasing necessary. No danger of bearings loading up with dust or dirt.
- Heavy cast saw flange.
- Permanent factory assembly. No adjustment required.
- Bolt locations for easy access.
- Available in either  $\frac{1}{2}$ " or  $\frac{5}{8}$ " size with righthand thread.
- Precise workmanship.
- Painted finish.
- Attractive appearance.
- Individually boxed.

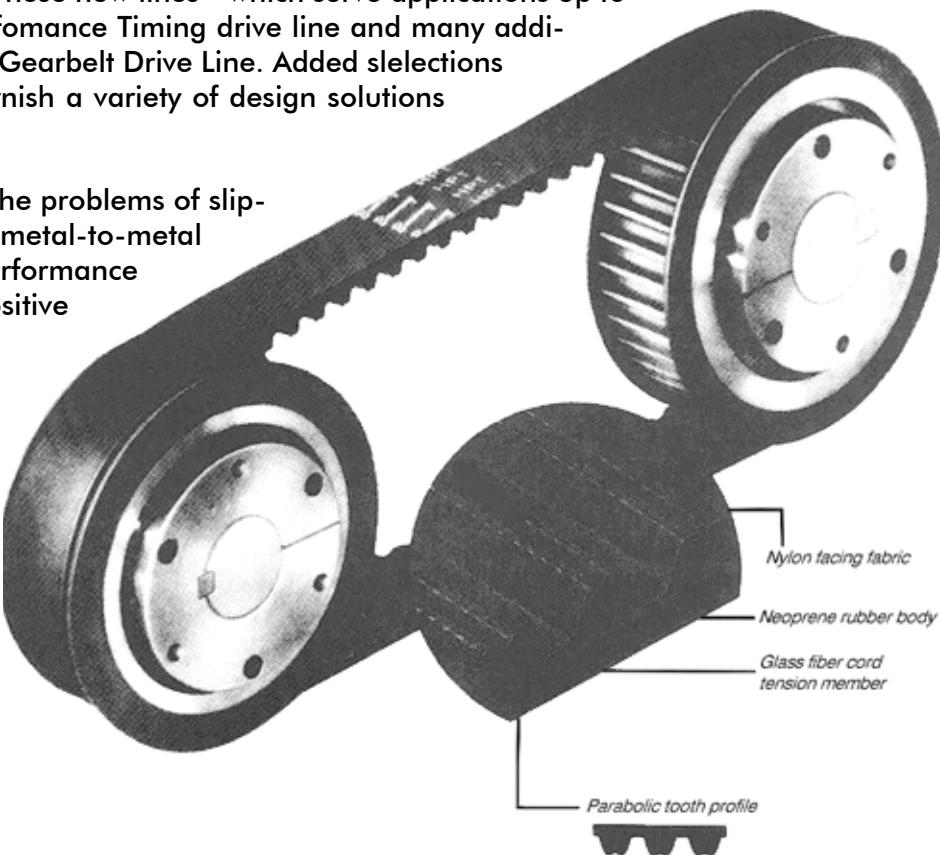

PART NO.	DESCRIPTION
PTP 4820	$\frac{1}{2}$ " shaft - right hand thread
PTP 4830	$\frac{5}{8}$ " shaft - right hand thread

## BROWNING SYNCHRONOUS BELT DRIVE SHEAVES

Combining the positive timing action of gears with the flexibility, speed and low noise level of belts.

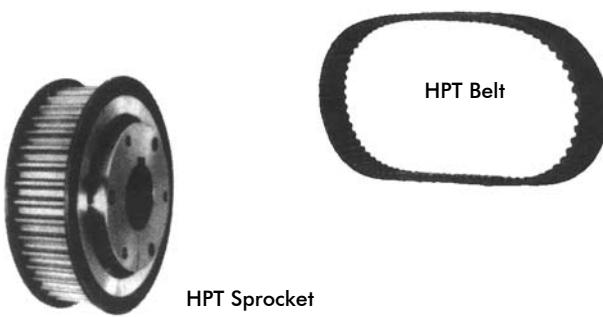

Browning now offers two expanded and enhanced synchronous belt drive lines to add to the most extensive belt drive line available anywhere. These new lines - which serve applications up to 600 HP - include the HPT High Performance Timing drive line and many additional sizes of the proven Browning Gearbelt Drive Line. Added selections include double Gearbelts which furnish a variety of design solutions for changing shaft rotation.

Synchronous Belt Drives eliminate the problems of slippage, belt stretch, lubrication and metal-to-metal contact; they provide superior performance because power is transmitted by positive engagement of belt teeth rather than by friction as in conventional belt drives.

Westward has available a full range of Browning timing belt drives. Contact your nearest branch for details.

SPROCKETS			BELTS	
PITCH	GROOVES	BORE RANGE	WIDTH	LENGTH
8 mm	22-192	1/2 - 3 1/2	20, 30, 50, 85 mm	480 - 4400 mm
14 mm	28-216	1/2 - 5 1/2	40, 55, 85, 115, 170 mm	966 - 6860 mm

**HPT Drives** offer a wide range of HP and speeds, from very low speeds - 10 RPM or less - to high speeds well over 5,000 RPM and horsepower ratings from fractional to more than 200 HP. Features and benefits include:

- significantly quieter operation
- new parabolic tooth profile
- glass fiber cord tension member
- neoprene rubber body
- nylon facing fabric
- positive drive, no slip
- lower belt tensions
- no lubrication required
- fully interchangeable with competitive types

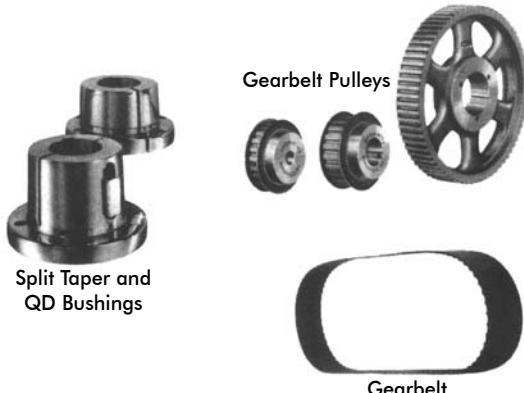

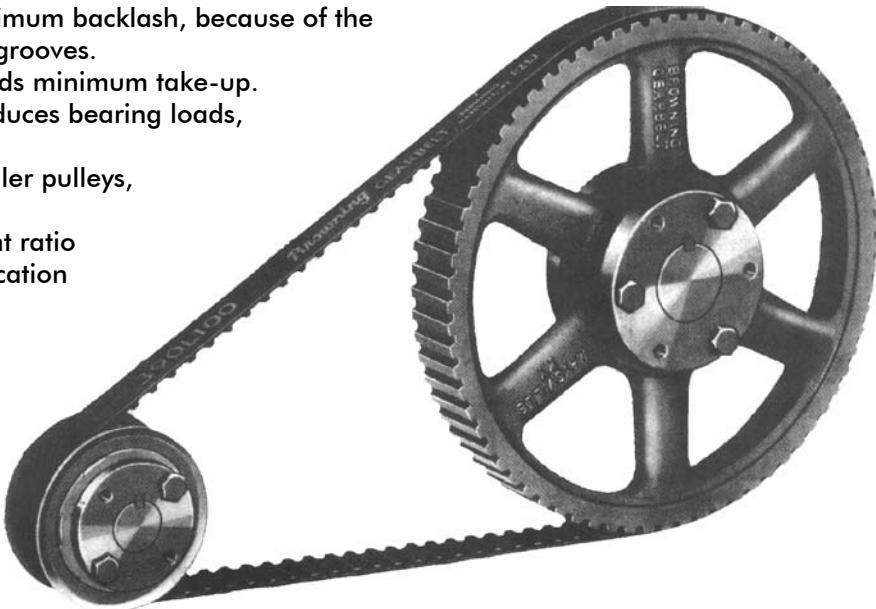

## BROWNING SYNCHRONOUS BELT DRIVES

**Gearbelt Drives** are offered in five stock pitches to handle a wide range of loads, speeds and applications.

Advantages include:

- **Constant speed** - no slip, no creep, minimum backlash, because of the positive grip of the belt teeth with pulley grooves.
- **High modulus strength member** - needs minimum take-up.
- **Freedom from initial belt tension** - reduces bearing loads, increases life.
- **Compact design** - gearbelts permit smaller pulleys, shorter centers, narrower belts.
- **Lightweight** - high horsepower-to-weight ratio makes gearbelt drives ideal for any application where weight is an important factor.
- **Less Heat** - because gearbelt drives generate virtually no friction!
- **No lubrication required.**
- **Wide load capacity range.**
- **Wide belt speed range.**

Both HPT and Gearbelt Drives offer a choice of the popular Browning split taper bushing or QD bushing for sprocket/pulleys.

### Gearbelt Drives

Pitch		Gearbelt Pulleys		Gearbelts		
		Grooves	Bore Range*	Belt Width	Pitch Length	No. Teeth
XL	1/5"	10 - 72	MB 3/16" - 1"	1/4" - 5/16" - 3/8"**	6.0" - 26.0"	30 - 130

\* MB = Minimum Bore. FB = Finished Bore. Others are bushing type.

\*\* Double Gearbelts available in XL, L & H sizes.

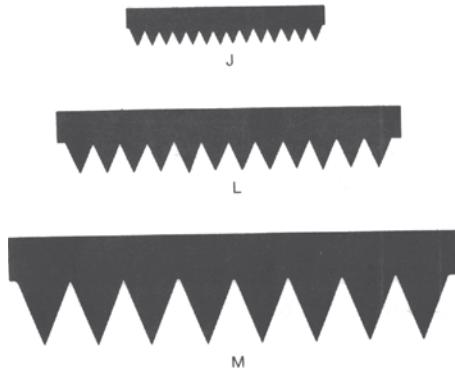

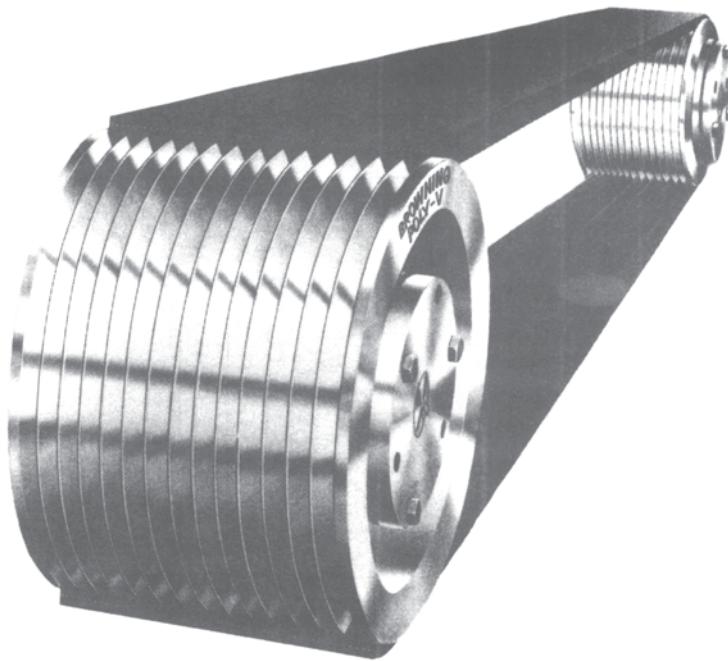

## BROWNING POLY-V DRIVES

All the advantages of V-Belts combines with the simplicity of flat belts.

**Browning Poly-V drives provide the best of all power transmission combinations:** the superior driving force of multiple V-belts without the matching problems associated with individual belts.

Poly-V drives pack more power in the same space...or the same power in less space. **They deliver up to 30 - 50% more power than conventional V-belt assemblies of equal size.** They can provide increased drive capacity when additional sheave width is not practical, or allow the use of narrower sheaves to furnish the same power output with a more compact drive. This also lessens drive weight, and can increase equipment life and reduce downtime.

A Poly-V belt is a single integrated assembly that provides even load distribution and uniform length of the individual belt segments. The one-piece design eliminated the close matching of individual belts that's required for optimum performance.

### Poly-V Drives

Cross Section		No. of Grooves	Pitch Diameter	Bore Range*	Belt Pitch Lengths
J	3/32" Rib Spacing	4, 6	1.25 - 1.90"	FB 3/8" - 1"	18.0 - 98.0"
		4, 6 10, 16	2.00 - 10.60"	3/8" - 2 11/16"	
L	3/16" Rib Spacing	6, 8, 10, 12, 14, 16, 20	3.00 - 30.00	1/2" - 3 3/4"	50.0 - 145.5
M	3/8" Rib Spacing	6, 8, 10, 12, 14, 16, 20	7.00 - 44.00	3/4" - 4 1/4"	90.0 - 198.0

\*FB = Finished Bore. Others are bushing type.

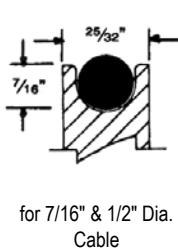

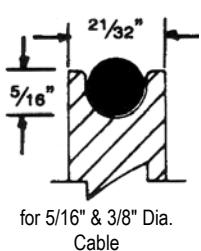

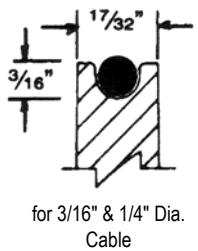

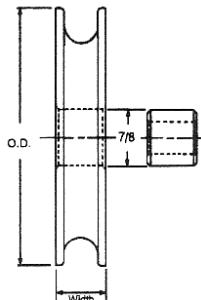

Poly-V is a registered trademark of Goodyear Tire & Rubber Co.

Westward has available a full range of Poly-V drives. Contact your nearest branch for details.

## STEEL WIRE ROPE PULLEYS

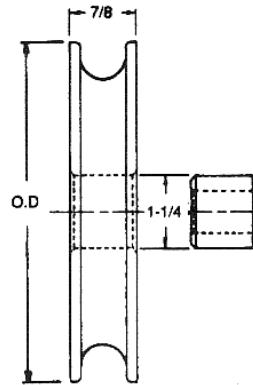

### 2" to 4" Outside Diameter

Pulleys are furnished with a  $\frac{7}{8}$ " stock bore to receive a press fit on the  $\frac{7}{8}$ " O.D. powdered metal bushing sizes. Pulleys and bushings should be ordered separately by part number.

### 5" to 10" Outside Diameter

Pulleys are furnished with a  $1\frac{1}{4}$ " stock bore to receive a press fit on the  $1\frac{1}{4}$ " O.D. powdered metal bushing sizes. Pulleys and bushings should be ordered separately by part number.

PTP 3H018X	1 1/8"

Note: A Low Hydrogen Electrode is recommended for welding hub to sprockets or pulleys.

See page 3-51 for idler style weld-on hubs.

### Hub Dimensions

	A	B	C	D	E
V-SERIES HUBS - To fit V Type Sprockets	1 1/8"	1 7/16"	7/16"	3/4"	1 3/16"
W-SERIES HUBS - To fit W Type Sprockets	1 5/8"	1 13/16"	7/16"	1"	1 7/16"
X-SERIES HUBS - To fit X Type Sprockets	2"	2 1/2"	7/16"	1"	1 7/16"
Y-SERIES HUBS - To fit Y Type Sprockets	2 3/4"	3 3/4"	11/16"	1 3/16"	1 7/8"

## IDLER WELD HUBS

For a quick idler application: Pick the appropriate Sprocket or Pulley and then pick the corresponding Idler Hub.

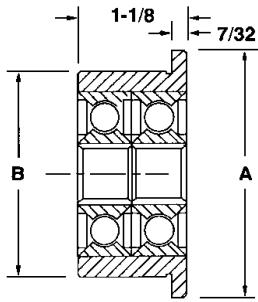

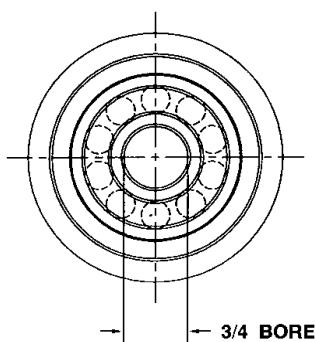

Idler Hubs machined to eliminate special fixtures. Simply clamp idler hub to sprocket or pulley and weld.

Three sizes available to fit W, X & Y Series weld-on sprockets & pulleys.

PART NO.	FITS SERIES	DIMENSIONS	
		A	B
PTP 23010W	W	1 13/16"	1 5/8"
PTP 33010X	X	2 1/4"	2"

*W & X Idler Hubs available in 5/8" I.D. Bores  
Packaged with 1/2" I.D. Reducer Bushing*

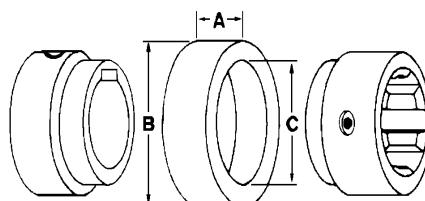

PART NO.	FITS SERIES	DIMENSIONS	
		A	B
PTP 53012Y	Y	3"	2 3/4"

*Y Hub is 3/4" Bore.*

## COUPLER HUBS

Coupler Hubs are designed to connect two separate shafts of the same OR different sizes.

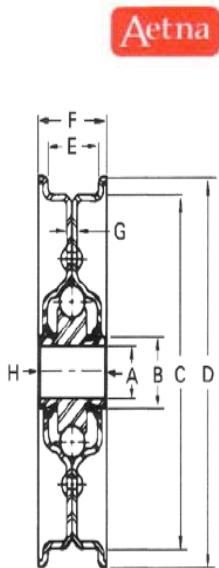

PART NO.	FITS HUB SERIES	DIM. A THRU BORE	DIM. B O.D.	DIM. C I.D.	APPROX WEIGHT
PTP W3226	W	1"	2"	1 5/8"	.32 lbs.
PTP X4032	X	1"	2 1/2"	2"	.50 lbs.

## ECONOMICAL ZINC PLATED IDLER PULLEYS

### V-Belt

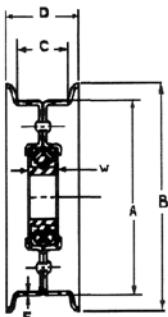

- Noiseless, precision ball bearings.
- Single-row, sealed retainer-type.
- Pulleys for B size V-belts.
- Rugged stamped metal, high-strength brazed or riveted construction.
- Protective zinc plating.

PART NO.	SIZE "A"	BORE	"C"	BELT SIZE
PTP 55950	3"	1/2"	.62	B
PTP 55951	3"	5/8"	.62	B

PTP 55953	3 1/2"	5/8"	.69	B
PTP 55954	4"	1/2"	.63	B
PTP 55955	4"	5/8"	.63	B
PTP 55956	5"	1/2"	.69	A/B
PTP 55957	5"	5/8"	.69	A/B

### Flat Belt Double Pulley

- Noiseless, precision ball bearings.
- Single-row, sealed retainer-type.
- Pulleys for A or B sized flat, poly V-belts, back side of V-belts, and cog belts.
- Rugged stamped metal, high-strength riveted construction.
- Protective zinc plating.

PART NO.	SIZE "A"	BORE	"C"	BELT SIZE
PTP 55959	2 3/4"	1/2"	.87	A/B
PTP 55960	2 3/4"	5/8"	.87	A/B

PTP 55966	6"	5/8"	2.0	A/B/C

## IDLER PULLEY DISPLAY

### Includes:

- 2 - PTP 55950 3" V Idler 1/2" bore
- 2 - PTP 55951 3" V Idler 5/8" bore
- 2 - PTP 55952 3 1/2" V Idler 1/2" bore
- 2 - PTP 55953 3 1/2" V Idler 5/8" bore
- 2 - PTP 55954 4" V Idler 1/2" bore
- 2 - PTP 55955 4" V Idler 5/8" bore
- 2 - PTP 55956 5" V Idler 1/2" bore
- 2 - PTP 55957 5" V Idler 5/8" bore
- 2 - PTP 55959 2 3/4" Flat Idler 1/2" bore
- 2 - PTP 55960 2 3/4" Flat Idler 5/8" bore
- 2 - PTP 55961 4" Flat Idler 1/2" bore
- 2 - PTP 55962 4" Flat Idler 5/8" bore

PART NO.	DESCRIPTION
PRM 559	Display Board

Note: Display board is free when full product package is purchased

## BROWNING ROLLER CHAIN DRIVES

Your strongest link to cost savings!

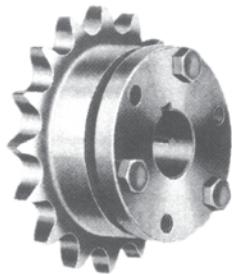

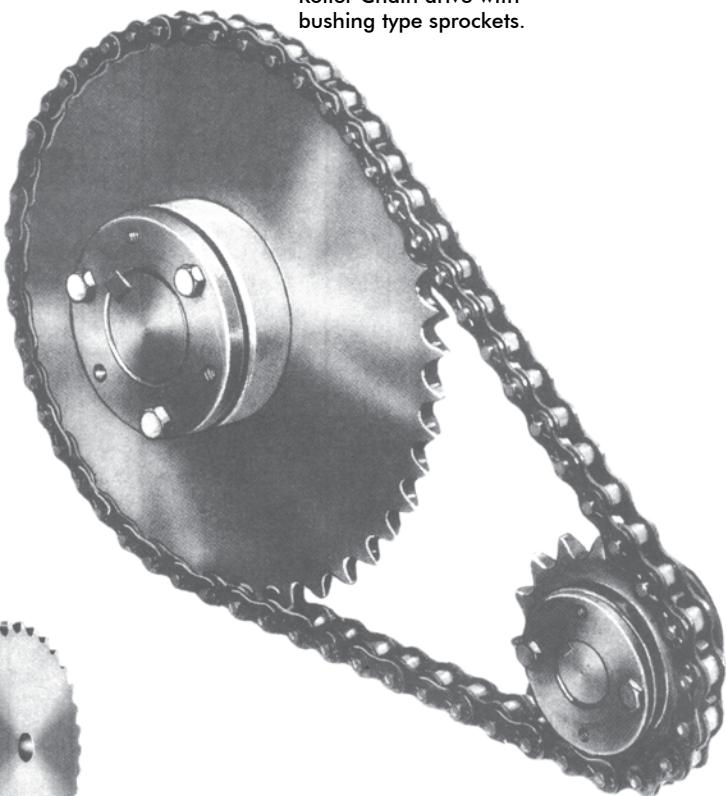

**No other manufacturer offers all these exclusive cost-saving features in roller chain drives:**

- In-stock hardened sprockets guaranteed to last at least twice as long as the standard mild steel (un-hardened) sprockets they replace. Reduce downtime, increase chain life.
- World's largest selection of shaft-ready sprockets, with three bushing types available: the popular Browning split taper bushing, the QD bushing and the new taper bore bushing. Include millimeter bores as well as standard  $\frac{1}{16}$ " increments. Spline bores available on split taper bushings. Also finished bore types in a full range of stock bores.
- Precision testing methods - Browning regularly used gear checking quality techniques in sprocket manufacturing.

To provide "what-you-want-when-you-want-it" service on made-to-order sprockets, Browning distribution centers carry extensive finished goods inventories, and rework facilities to provide rapid turnaround on modification orders.

Link up with Browning for all your roller chain drive requirements...and you'll be certain of maximum drive efficiency and minimum costs!

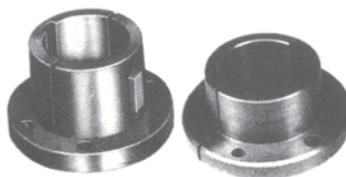

Roller Chain drive with bushing type sprockets.

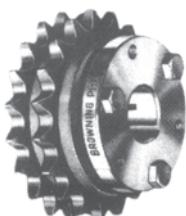

Bushing type single sprocket

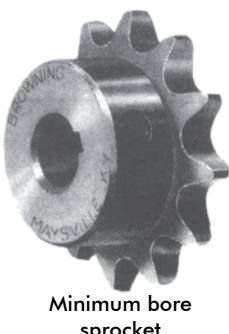

Steel plate sprocket

Choice of three bushings

Bushing type double sprocket

Minimum bore sprocket

Extended pitch drive chain	2040 - 2060
Extended pitch conveyor chain	
Standard roller	2040 - 2120
Large roller	2042 - 2082
Chain attachments	
Standard	25 - 160
Extended pitch	2040 - 2080, 2042 - 2082
MULTIPLE STRAND	PITCH
Standard - double, triple, quadruple	35 - 200
Heavy - double, triple, quadruple	60 - 160
Pre-lubricated - double	40 - 80

## SPROCKETS

Westward Parts stocks a complete line of Browning bushing style and minimum bore "B" type sprockets. The Browning split taper bushed style sprockets incorporate the Browning bushing system, which accommodates the complete round shaft coverage plus millimeter and spline bores as shown:

All Browning bushing type sprockets shown having 30 teeth or less, are supplied with hardened teeth and are guaranteed to last twice as long as any standard sprocket.

TYPE	INCH	MILLIMETER
G Bushing	$\frac{3}{8}$ - 1	10 - 25
H Bushing	$\frac{3}{8}$ - $1\frac{1}{2}$	10 - 38
P1 Bushing	$1\frac{1}{2}$ - $1\frac{3}{4}$	14 - 42
Q1 Bushing	$\frac{3}{4}$ - $2\frac{11}{16}$	18 - 65
R1 Bushing	$1\frac{1}{8}$ - $3\frac{3}{4}$	28 - 95
S1 Bushing	$1\frac{11}{16}$ - $4\frac{1}{4}$	-

### Other advantages of Browning sprockets:

- off the shelf delivery
- no machining required on bushing type sprockets
- excellent coverage of all bore sizes and types
- easy installation and removal
- minimum down times

### Spline Bores

	H	P1	Q1
.978 - 10INV	X	X	-
$1\frac{1}{8}$ - 6B	X	X	X
$1\frac{1}{4}$ - 10B	-	X	-
$1\frac{3}{8}$ - 6B	X	X	X
$1\frac{3}{8}$ - 10B	-	X	X
$1\frac{3}{8}$ - 21INV	X	X	X

Westward Parts also has available a full line of both QD & Taper Lok style sprockets. See your nearest branch for availability.

\*Maximum bore shown is with standard keyway and setscrew over keyway. Slightly larger bores are possible with no keyway, shallow keyway or setscrew at angle to keyway.  
+ Hub is recessed for chain clearance.  
Type "B" sprockets are made without keyways and setscrew. They are furnished with minimum bore which can be reborced to size, keywayed and setscrewed for a reasonable extra charge.

**"B" TYPE SPROCKETS**

For #80 Roller Chain

**Sprockets for No. 80, 1" Pitch ANSI Chain  
Steel Single Type "B" Minimum Bore Sprockets**

\*Maximum bore shown is with standard keyway and setscrew over keyway. Slightly larger bores are possible with no keyway, shallow keyway or setscrew at angle to keyway.

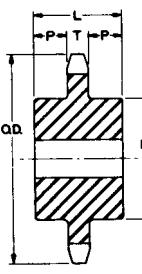

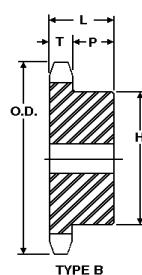

+ Hub is recessed for chain clearance.

These Type "B" and "C" Sprockets are furnished with no keyway and no setscrew. They are made with minimum bore which can be reborred to size, keywayed and setscrewed for a reasonable extra charge.

Where two sprockets with the same number of teeth but different bushings are offered, we suggest using the sprocket bushing for heavier service drives.

See pages 28-32  
for Bushings

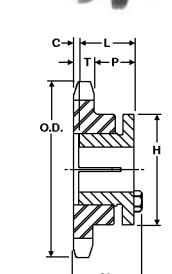

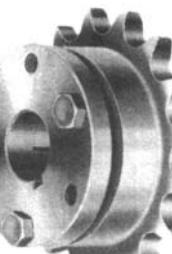

1 3/8" Bore Bushings also available with 3/8" x 3/16" keyseat.

1 3/8" Bore Bushings also available with 3/8" x 3/16" keyseat.

See pages 28-32 for  
Bushings

Where two sprockets with the same number of teeth but different bushings are offered, we suggest using the sprocket bushing for heavier service drives.

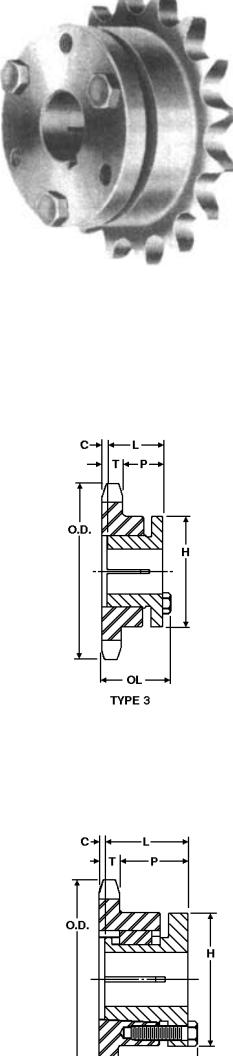

**BUSHED SPROCKETS**

For #60 Roller Chain

Steel Single Sprockets with Split Taper Bushings

See pages 28-32  
for Bushings

Where two sprockets with the same number of teeth but different bushings are offered, we suggest using the one with the larger bushing for heavier service drives.

**BUSHED SPROCKETS**

For #100 Roller Chain

## CLUTCHES, BRAKES AND OTHER POWER TRANSMISSION PRODUCTS

### A Wide Variety of Specialized Products for Automatic Production

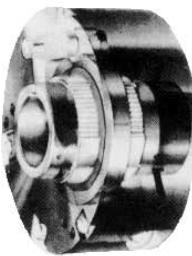

Browning is adding new power transmission products on a continuing basis to broaden the industry's already widest line. As part of this ongoing program, Browning today offers a wide variety of clutches, clutch/brake/coupling combinations, drive tighteners, idlers, hubs, set collars and many other power transmission products. All of these products exemplify Browning's commitment to serving your every requirement in power transmission drives and components.

For example, the advance design Browning/Dynacorp clutch/brake/coupling product line offers up to 37% higher standard torque than competitive models, along with a host of other features-benefits - at no extra cost:

- single electrical connector points
- rugged cast aluminum housings
- stainless steel armature hubs
- 100% product testing
- heavy duty steel tie bolts

TORQ/GARD overload clutches and TORQ/PRO ball detent overall clutches protect your equipment from over-load situations and costly downtime.

**Westward has available a full range of  
Browning Clutches and Brakes.  
See your nearest branch for availability.**

Double adjusting  
drive tightener

Gearbelt  
pulley  
idler

## BROWNING TORQUE LIMITERS

Browning Torque Limiters are torque control devices which slip under excessive load, but automatically carry the desired load after the excess has been removed. They can easily be adjusted to slip at a desired overload, automatically re-engaging when overload is removed. Overload should be removed promptly since prolonged slippage can be detrimental to the friction disc. No resetting generally is required after the Torque Limiter has slipped. Torque Limiters prevent machine damage, product damage and costly down time caused by shock loads, overloads or machine jams. They should not be used as clutches or to prevent personal injury.

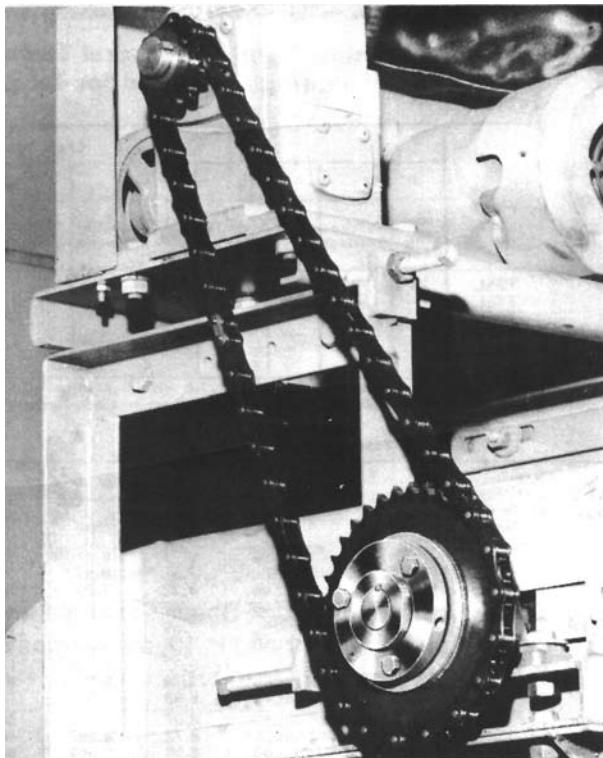

Browning Torque Limiters are primarily for use with sprockets. Sprockets in a wide variety of sizes are available from stock as indicated. Other Stock Type "A" Sprockets can be reworked for Torque Limiters.

Maximum Torque Rating shown can be obtained by using a drive member with center flanges ground to approximately 100 micro-inches surface finish. Rough or rusty center flanges will cause erratic torque values and rapid wear on friction discs. Oil or grease on the center flange or friction discs will reduce the torque values.

### Torque Limiter Adjustment

Adjustment of Browning Torque Limiters is fast, simple, and positive. Only an open end wrench and a socket head set screw wrench are needed.

1. Back-off the three cap screws until the points are recessed in the threaded adjusting collar.
2. Tighten the threaded adjusting collar by hand and then tighten the cap screws with an open end wrench until the heads bottom.
3. Try the unit in its application and if further adjustment is necessary, loosen cap screws until points are recessed in the adjusting collar. Torque can also be checked by applying tension to one strand of chain with a spring scale or other means.
4. Tighten or loosen the adjusting collar as needed, then retighten the cap screws until the heads bottom.

### Torque Limiter Selection

When the torque at which the device should slip is determined, simply choose a Torque Limiter from Table No. 2, which has a maximum torque rating as great or greater than the required torque. Check to see if required bore is available, see Table No. 3. It is good practice to select the Torque limiter with a maximum torque rating reasonably greater than the required torque when possible. Torque Limiters should not be used on High Speed Drives.

#### Example:

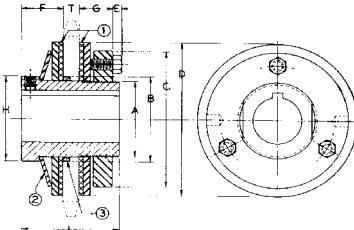

To prevent damage to a conveyor system, a device is needed on the head pulley shaft which will slip at 2100 inch pounds of torque. Shaft size is  $1\frac{1}{4}$ " diameter.

From Table No. 2, note that a T45L Torque Limiter will produce a maximum torque of 2800 inch pounds. It is also available with a  $1\frac{1}{4}$ " bore. The proper Torque Limiter then, is **T45L x  $1\frac{1}{4}$ "**.

## SPLIT TAPER & QD WELD-ON HUBS

These weld-on hubs are machined to fit our standard weld-on sprocket on pages 60, 61, 62 & 63. The hubs will adapt all W\* and X Series weld-on sprockets to a simple QD & Split Taper Bushing system. QD & Split Taper Bushings are listed on pages 28-32 of this section.

PART NO.	FITS WELD-A-SPKT SERIES	FITS OD BUSHING NO.	A	B	C	D	E	APPROX. WEIGHT
PTP WJA	W*	JA	1 5/8"	2 1/16"	5/16"	7/16"	3/4"	0.41 lbs.
PTP XSH	X	SH	2"	2 11/16"	3/8"	1/2"	7/8"	0.57 lbs.

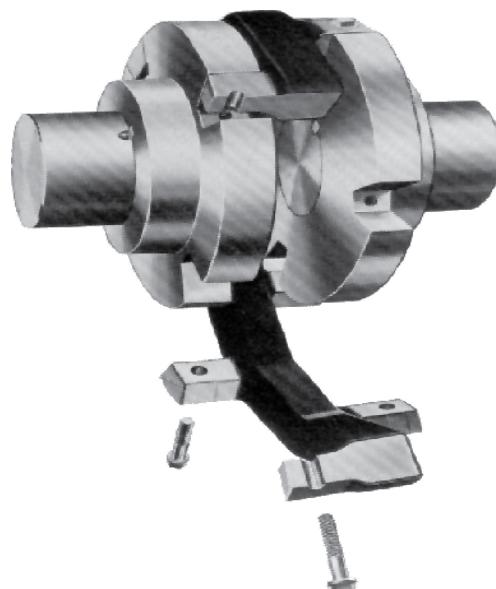

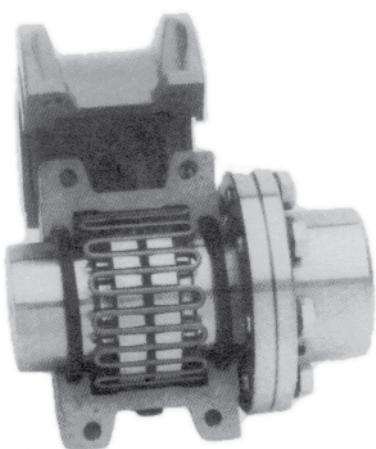

### To Fit Browning Series Bushings

PART NO.	FITS WELD-A-SPKT SERIES	FITS OD BUSHING NO.	A	B	C	D	E	APPROX. WEIGHT
PTP XH	X	H	2"	2 1/2"	5/16"	5/8"	15/16"	0.70 lbs.
PTP YP1	Y	P1	2 3/4"	3"	9/16"	3/4"	1 5/16"	1.40 lbs.

\*Will not allow chain clearance on 5012W, 5013W, 6011W or 8009W. Note: Shorter length bolts are furnished with hub.

Remember to order Bushing when ordering Weld Hub.

**Westward Parts has available a full selection of  
Kop-Grid Tapered Grid Couplings &  
Kop-Flex Elastometric Type Couplings**

## WELD-ON HUBS

For use on Pulleys, Sprockets & Custom Applications

See page 84 for idler style weld-on hubs.

PART NO.	BORE SIZE
PTP 2H010W	5/8"
PTP 2H012W	3/4"
PTP 2H014W	7/8"
PTP 2H016W	1"
PTP 2H018W	1 1/8"
PTP 2H020W	1 1/4"
PTP 3H010X	5/8"
PTP 3H012X	3/4"
PTP 3H014X	7/8"
PTP 3H016X	1"
PTP 3H018X	1 1/8"

NOTE: A Low Hydrogen Electrode is recommended for welding hub to sprockets or pulleys.

### Hub Dimensions

	A	B	C	D	E
V-SERIES HUBS To fit V Type Sprockets	1 1/8	1 7/16	7/16	3/4	1 3/16
W-SERIES HUBS To fit W Type Sprockets	1 5/8	1 13/16	7/16	1	1 7/16
X-SERIES HUBS To fit X Type Sprockets	2	2 1/2	7/16	1	1 7/16
Y-SERIES HUBS To fit Y Type Sprockets	2 3/4	3 3/4	11/16	1 3/16	1 7/8

## DOUBLE PULLEY HUBS

The Double Pulley Hubs are designed to eliminate any special fixtures for pulley alignment and positioning.

### Assembly in 3 Easy Steps

1. Clamp one pulley flush against the shoulder of the Double Pulley Hub and weld both together.
2. Slide the second pulley onto the machined step.
3. Clamp so that it is tight against the first pulley and weld the pulley to the hub on the machined step.

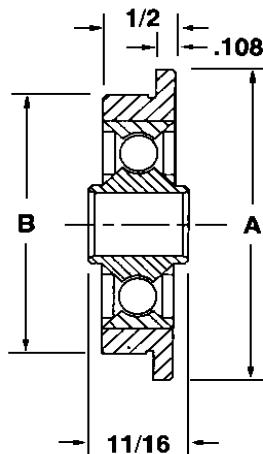

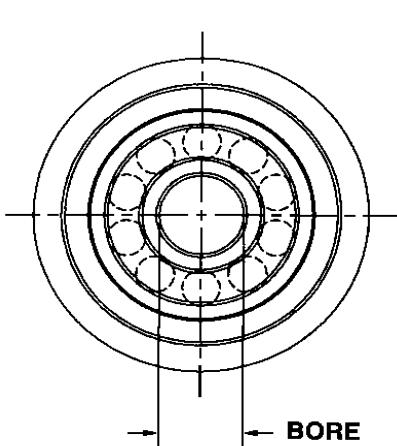

PART NO.	BORE SIZE	KEY WAY	SET SCREWS
PTP DPH0075	3/4"	3/16" x 3/32"	2" x 1/4" -20
PTP DPH0875	7/8"	3/16" x 3/32"	2" x 1/4" -20
PTP DPH1000	1"	1/4" x 1/8"	2" x 5/16" -18
PTP DPH1125	1 1/8"	1/4" x 1/8"	2" x 5/16" -18
PTP DPH1250	1 1/4"	1/4" x 1/8"	2" x 5/16" -18
PTP DPH1250-X	1 1/4"	1/4" x 1/8"	2" x 5/16" -18
PTP DPH1375-X	1 3/8"	5/16" x 5/32"	2" x 3/8" -16
PTP DPH1500-X	1 1/2"	3/8" x 3/16"	3" x 3/8" -16

## IDLER WELD HUB

For a quick idler application:

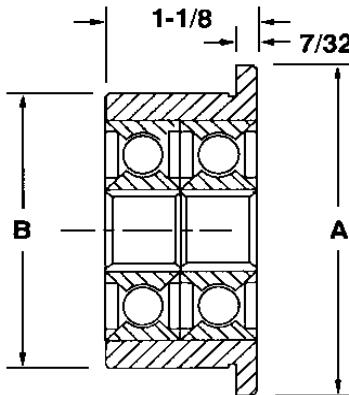

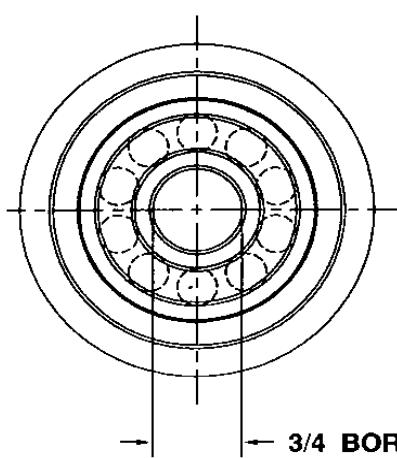

Pick the appropriate Sprocket or Pulley and then pick the corresponding Idler Hub.

Three sizes available to fit W, X & Y series weld-on sprockets and pulleys.

PART NO.	FITS SERIES	DIMENSIONS	
		A	B
PTP 23010W	W	1 13/16	1 5/8
PTP 33010W	X	2 1/4	2

*W & X Idler Hubs available in 5/8 I.D. Bores packaged with 1/2 I.D. Reducer Bushing*

PART NO.	FITS SERIES	DIMENSIONS	
		A	B
PTP 53012Y	Y	3	2 3/4

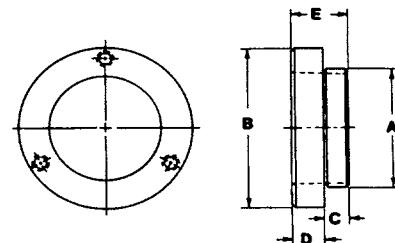

*Y Hub is 3/4" Bore.*

Idler Hubs machined to eliminate special fixtures.

Simply clamp idler hub to sprocket or pulley and weld.

## SPLIT TAPER & QD WELD-ON HUBS

These weld-on hubs are machined to fit our standard weld-on sprocket on pages 65, 66, 67 & 68. The hubs will adapt all W\* and X Series weld-on sprockets to a simple QD & Split Taper Bushing system. QD & Split Taper Bushings are listed on page 32 & 33 of this section.

PART NO.	FITS WELD-A-SPRKT SERIES	FITS QD BUSHING NO.	A	B	C	D	E	APPROX. WEIGHT
PTP WJA	W*	JA	1 5/8"	2 1/16"	5/16"	7/16"	3/4"	0.41 lbs.
PTP XSH	X	SH	2"	2 11/16"	3/8"	1/2"	7/8"	0.57 lbs.

### To Fit Browning Series Bushings

PART NO.	FITS WELD-A-SPRKT SERIES	FITS QD BUSHING NO.	A	B	C	D	E	APPROX. WEIGHT
PTP XH	X	H	2"	2 1/2"	5/16"	5/8"	15/16"	0.70 lbs.
PTP YP1	Y	P1	2 3/4"	3"	9/16"	3/4"	1 5/16"	1.40 lbs.

\*Will not allow chain clearance on 5012W, 5013W, 6011W or 8009W.

Note: Shorter length bolts are furnished with hub.

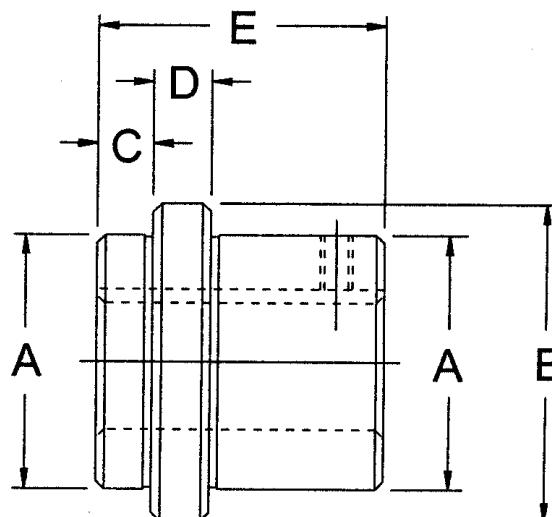

Remember to order Bushing when ordering Weld Hub.

### Weld Hubs to Make Double Sprockets

50 CHAIN DOUBLE HUB	50 CHAIN DOUBLE HUB
A - 2	A - 2
B - 2 1/4 to 2 1/2	B - 2 1/4 to 2 1/2
C - 5/16	C - 7/16
D - 3/8	D - 7/16
E - 1 7/8	E - 2 1/4

Place sprocket on each side of hub & weld to make a double sprocket.

- PTP X5016, 1" Bore
- PTP X5020, 1 1/4" Bore
- PTP X6016, 1" Bore
- PTP X6020, 1 1/4" Bore

## Weld-On Display Assortment

**PART NO.**
**PTP 2448**

Display Size 24" x 48"

Shipping Weight - 130 lbs.

Includes 61 sprockets, 48 hubs, complete with display board and hardware

Contains the following:

## WELD-ON SPROCKETS

For A550 & CA550 Chain\* & 55 Detachable

PART NO.	NO. OF TEETH	SPROCKET O.D.	USE HUB SERIES
PTP 55006W	6	3 3/4"	W
PTP 55007X	7	4 1/4"	X
PTP 55008X	8	4 3/4"	X
PTP 55009X	9	5 1/4"	X
PTP 55010X	10	5 3/4"	X
PTP 55011X	11	6 1/4"	X
PTP 55012X	12	6 3/4"	X
PTP 55013X	13	7 1/4"	X
PTP 55014X	14	7 3/4"	X
PTP 55015X	15	8 1/4"	X

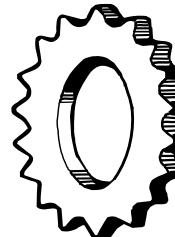

A550 & CA550 have a pitch size of 1.630"

For A620 & CA620 Chain\* & 62 Detachable

PART NO.	NO. OF TEETH	SPROCKET O.D.	USE HUB SERIES
PTP 62006W	6	3 7/8"	W
PTP 62007X	7	4 3/8"	W
PTP 62008X	8	4 7/8"	X
PTP 62009X	9	5 3/8"	X
PTP 62010X	10	5 7/8"	X
PTP 62011X	11	6 1/2"	X
PTP 62012X	12	7"	X

A620 & CA620 have a pitch size of 1.654"

\*Sprockets will also fit Steel Detachable Chain

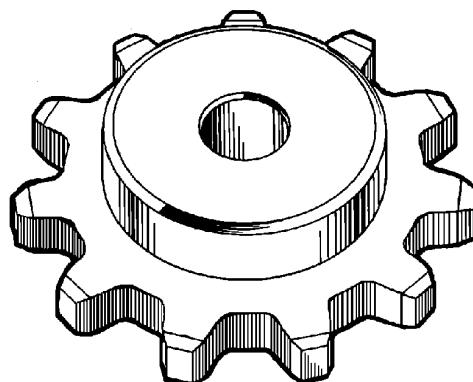

## CAST & STEEL SPROCKETS

For #67 Detachable Chain

#67 Chain = 2.313" pitch length

PART NO.	CHAIN SIZE	NO. OF TEETH	PITCH DIA.	MATERIAL
PTP 67B6C	67	6	4.62"	cast
PTP 67B7C	67	7	5.31"	cast
PTP 67B8C	67	8	6.05"	cast
PTP 67B6S	67	6	4.62"	steel
PTP 67B7S	67	7	5.31"	steel
PTP 67B8S	67	8	6.05"	steel

Note: All sprockets have a rough stock bore.

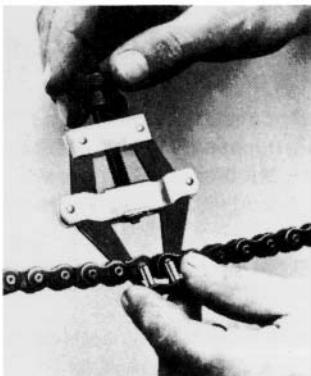

## CHAIN PULLERS

This unique tool was designed to make roller chain installation quick and easy. In fact, it's almost like having a third hand.

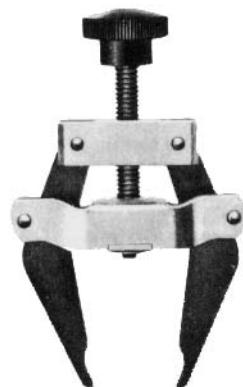

PART NO.	CHAIN SIZE	JAW SPREAD	WT. (LBS.)
PTP 35	No. 35 to 60	2"	.4
PTP 80	No. 80 to 240	5"	2.0

**To use the Browning Chain Puller:** (1) hook the two jaws into each end of the chain; (2) turn the screw until the two ends almost meet; (3) insert the connecting link and fasten.

PTP80

PTP35

## ECONOMICAL ROLLER CHAIN HOLDER

**The Roller Chain Holder for ANSI chain sizes 35 through 60.**

Now a one man job for fast, easy replacement of broken links. You can now hold your chain together in position and leave your hands free for working, not chain holding.

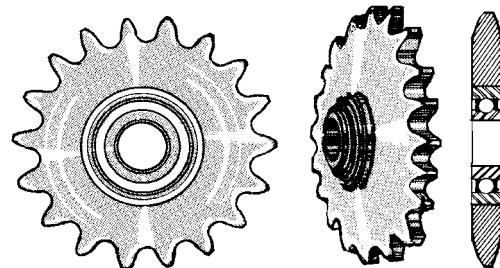

This compact tool will save time and effort by allowing you to repair roller chain without removing it from your machine.

PART NO.
PTP CH-1

## ROLLER CHAIN TOOL

Removes connecting pin completely.  
 No need for hammer and punch to finish the job!

**Patented clamping cylinder assures proper alignment for punching and riveting.**  
 Serves as portable vise, aligning the chain securely in the tool's jaws and positioning the punch squarely in line with the connecting pin. This clamping sleeve eliminates sidebar distortion. Then, with a few turns of the punch screw with a wrench, the user can apply gradual pressure and force the pin all the way out.

PART NO.	DESCRIPTION
CHA B5035	#35 to #50 Tool
CHA B5038	Pin for B5035
CHA A8050	#50 to #80 Tool
CHA A8053	Pin for A8050

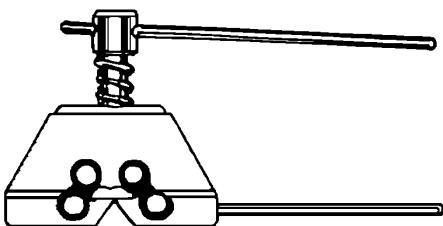

### Model A-8050

Fits #50, #60 and #80 Series Roller Chain including 60H and 80H.

### Model B-5035

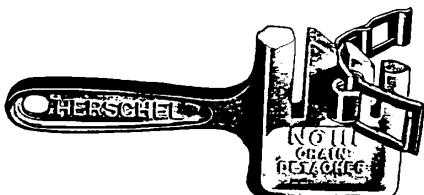

For repairing #35, #40, #41 and #50 series roller chain. Ideal tool for the midsized chain found on ag equipment. Same patented features and clear, heavy duty clamshell packaging as Model A-8050.

## TRADITIONAL CHAIN TOOL

PART NO.	DESCRIPTION	CHAIN SIZE
CHA 165113	PE-113 chain breaker	25 thru 60
CHA 165114	PE-113 replacement tip	
CHA 165135	PE-135 chain breaker	60 thru 100
CHA 165136	PE-135 replacement tip	

## DETACHABLE STEEL CHAIN BREAKERS

PART NO.	DESCRIPTION
CHA 111	Breaker for detachable chain

Display Board is free with Product Package order.

## AGRICULTURAL TYPE IDLER SPROCKETS

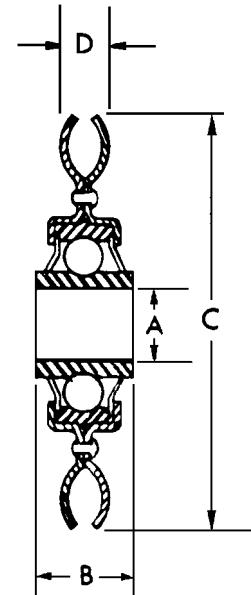

- Top quality at low, low cost.
- Durable, long-lasting design.
- Two stamped, hardened halves hold a pre-lubricated, sealed bearing single pitch or extended pitch idlers.
- $\frac{1}{2}$ " or  $\frac{5}{8}$ " bores - mount with standard bolts.
- Virtually maintenance-free operation.
- Zinc-plated finish.

Ball Bearing Type  
Precision Sealed Bearing

## BROWNING COUPLINGS

You can always count on the right connection when you specify Browning couplings! Choose from over 17,000 different combinations of types, sizes and bores - entirely from stock - for shaft sizes from  $\frac{1}{4}$ " to  $8\frac{7}{8}$ ", and applications up to many thousands of horsepower as shown. Included are pin type, new jaw type, chain, Ever-Flex, sleeve, rigid and two new designs specifically intended for higher horsepower and rugged bulk material handling applications: the GRID-FLEX coupling with tapered grid, and a new family of Gear Couplings in flange and continuous sleeve designs.

Many Browning couplings are available with Browning's exclusive easy-on easy-off split taper bushing, as well as finished bore and minimum bore. Choose whichever you prefer, but choose Browning - and be sure of the right connection, every time!

\*Capacity is calculated with a service factor of 1.0 and with BUNA-N inserts.

NOTE: Bodies are stocked individually. Order 2 bodies and 1 spider to make a complete coupling.

We also stock L050N, L150N & L190N spiders.

### Available in the following bore sizes:

NOTE: "X" designates items as standard stock. Larger sizes also available.

BORE SIZE	L070	L075	L090	L095	L099	L100	L110

## BROWNING JAW TYPE COUPLINGS

### "FS" FINISHED BORE-STEEL

Finished Bore "FS" Couplings are machined from bar steel and have steel drive pins. They are equipped with Neoprene Inserts which are oil and grease proof as well as heat resistant. They are fitted with hollow head set screws and have standard keyseats.

## BROWNING SLEEVE COUPLINGS

Browning Bushed Type Sleeve Couplings are machined from steel for use with Browning Malleable Split Taper Bushings.

Type CSH

Type CSP and CSQ

### Specifications

PART NO.	BUSHING		DIMENSIONS							WT. LBS.
	SIZE	BORE RANGE	O.D.	L	H	G	X	E	T°	
CSH	H	3/8" - 1 1/2"	2 1/2"	2 7/8"	2 1/2"	7/16"	2"	3/16"	1700	1.6
CSP	P1	1/2" - 1 3/4"	3"	4 1/4"	3"	5/8"	3"	1/4"	5660	9.6
CSQ	Q1	3/4" - 2 11/16"	4 3/8"	5 1/2"	4 1/8"	3/4"	4"	9/32"	14600	9.6

*T = Maximum recommended torque in inch/pounds for normal service. For shock loads reduce these ratings by 50%. Maximum torque shown is based on coupling strength. Smaller torque, check shaft and key stress.*

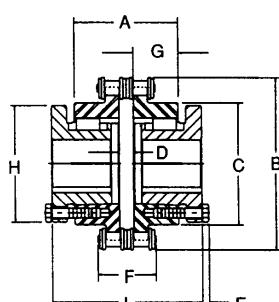

Note: Order two bushings.

## BROWNING BUSHING TYPE DRC CHAIN COUPLINGS

### Split Taper Bushing Type

Browning Split Taper Bushing Type Chain Couplings are made with solid steel sprockets with hardened teeth. They are machined specifically for Browning's exclusive Split Taper Bushings, which are interchangeable in the full range of Browning sheaves, sprockets, gears, pulleys, hubs and other couplings.

### Split Taper Bushing Type Chain Couplings - Specifications

COUPLING HALF* HALF PART NO.	BUSHING		COUPLING DIMENSIONS - INCHES								WT. LBS. COUPLING

For maximum service lift, a cover with proper lubrication is required for couplings selected with ratings to the right of the heavy line.

\*WARNING - Couplings with covers must not be operated beyond this speed.

## BROWNING COVERS & REPLACEMENT CHAIN

### CHAIN COUPLING COVERS

Browning Chain Coupling Covers extend the life of the couplings by providing continuous lubrication and protection from abrasive and corrosive conditions. They are fitted with Neoprene seals, standard  $\frac{1}{8}$ " pipe plugs and "Nyloc" cap screws, and fit all Browning chain couplings - finished bore, minimum bore, split taper bushing type and taper bore bushings type.

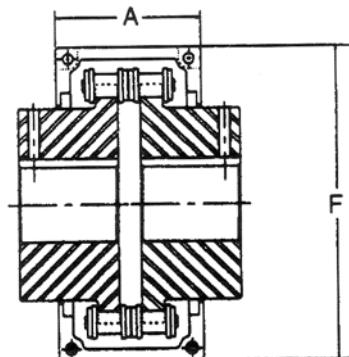

**CAUTION - Browning chain coupling covers should not be operated at speed exceeding 5000 RPM rim speed.**

#### Aluminum Covers

## "R-FLEX" COUPLING SELECTION

**NOTE:** These applications depict the generally accepted conditions encountered in industry. Conditions subject to extreme temperatures, abrasive dusts, corrosive liquids and dusts, excessively high starting torques, etc. must be considered as extra heavy shock loads. These conditions will increase the service factors. Consult factory for these selections.

### Prime Mover Classification

PRIME MOVER	CLASS
Turbines	A

## BROWNING STOCK GEARS

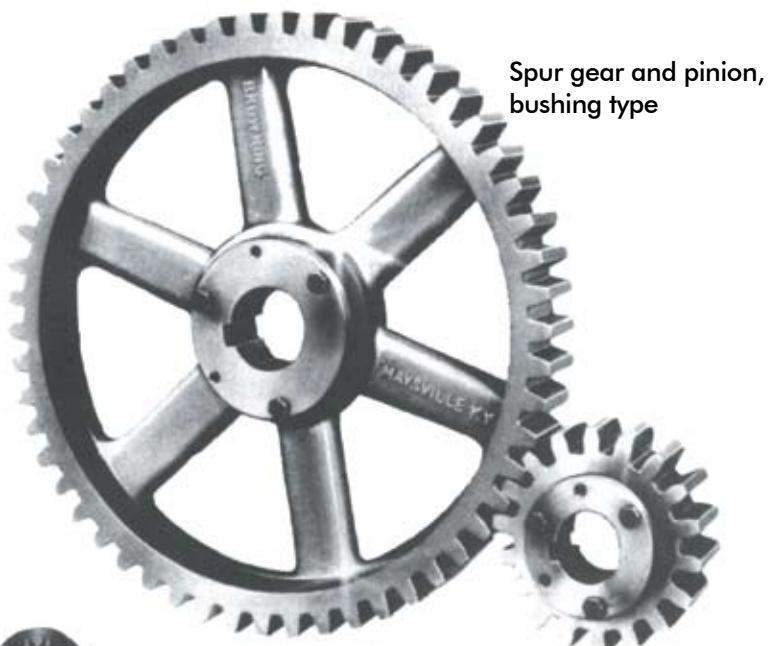

Browning offers one of the most comprehensive lines of off-the-shelf gears in the industry, including spur, helical, miter and bevel, worm and change gears. These are available in 20° pressure angle from 20 to 4 dp, and 14 1/2° pressure angle from 48 to 3 dp...all designed to increase output, reduce costs and avoid specials.

- Thousands of shaft-ready finished bore and bushing types (a Browning exclusive) eliminate rework costs, assure true-running precision at all times.
- More stock sizes made of steel...you get weldability plus greater strength, at cast iron prices.
- Extra tooth depth and larger radii provide stronger teeth, a deeper lubrication reservoir and more clearance.
- Many helical and bevel gears are available hardened for longer life. Most worms are hardened and ground.
- Many odd-tooth sizes.
- Custom gear capabilities - up to 60" dia. and 17" face.

All Browning gears meet AGMA quality standards and our own close manufacturing tolerances. Gear up with Browning to increase your productivity!

**Westward has available  
a full range of Browning  
gears and gear racks.**

Spur, Change Gear	Steel	14 1/2°	20, 16, 12, 10, 8	20 - 129	5/8" - 1 3/8"**
Rack	Brass	14 1/2°	48, 32, 24, 16		
	Steel	14 1/2°	32, 24, 20, 16, 12, 10, 8, 6, 5, 4, 3		
	Steel	20°	20, 16, 12, 10, 8, 6, 5, 4		
Spur, Min. Bore	Non-Metallic	14 1/2°	16, 12, 10, 8, 6, 5	12 - 96	3/8" - 2 1/4"
		20°	16, 12, 8	15 - 24	3/8" - 1 3/4"
Stem Pinions	Steel	14 1/2°	20, 16, 12, 10, 8, 6	5 - 10	
BEVEL AND MITER GEARS					
Bevel	Unhardened Steel	20°	20, 16, 14, 12, 10, 8, 6, 5, 4, 3	10 - 96	3/16" - 3"
Miter	Hardened & Unhardened Steel	20°	32, 24, 20, 16, 14, 12, 10, 8, 6, 5, 4	12 - 32	3/16" - 3"
Spiral Bevel	Hardened Steel	20°	14, 10, 8	16 - 34	1/2" - 1 1/2"
Spiral Miter			12, 10, 8, 7, 6, 5	15 - 28	1/2" - 1 3/8"
WORMS AND WORM GEARS					
Worm and Gear Single Thread	Cast Iron & Bronze Worm Gears	14 1/2°	32, 24, 16, 12, 10, 8, 6, 5, 4, 3	20 - 128	3/16" - 2 7/8"
	Steel Worms	14 1/2°	32, 24, 16, 12, 10, 8, 6, 5, 4, 3	(.438 - 4.0 pd)	3/16" - 1 1/2"
Worm and Gear Double Thread	Cast Iron & Bronze Worm Gears	20°	32, 24, 16, 12, 10, 8, 6	20 - 128	1 13/16" - 1"
	Steel Worms	20°	32, 24, 16, 12, 10, 8, 6		
Worm and Gear Quadruple Thread*	Cast Iron & Bronze Worm Gears	25°	32, 24, 16, 12, 10, 8, 6	20 - 100	3/16" - 1 13/16"
	Steel Worms	25°	32, 24, 16, 12, 10, 8, 6		3/16" - 1"
HELICAL GEARS					
Helical (45° Helix)	Steel & Bronze	14 1/2°	24, 16, 12, 10, 8, 6	8 - 72	3/16" - 1 1/4"
*Triple thread available in 20° PA, 5 pitch, 29-50 tooth bronze worm gears & steel worms. **Bushings bore range is 7/16" - 1 1/8"					

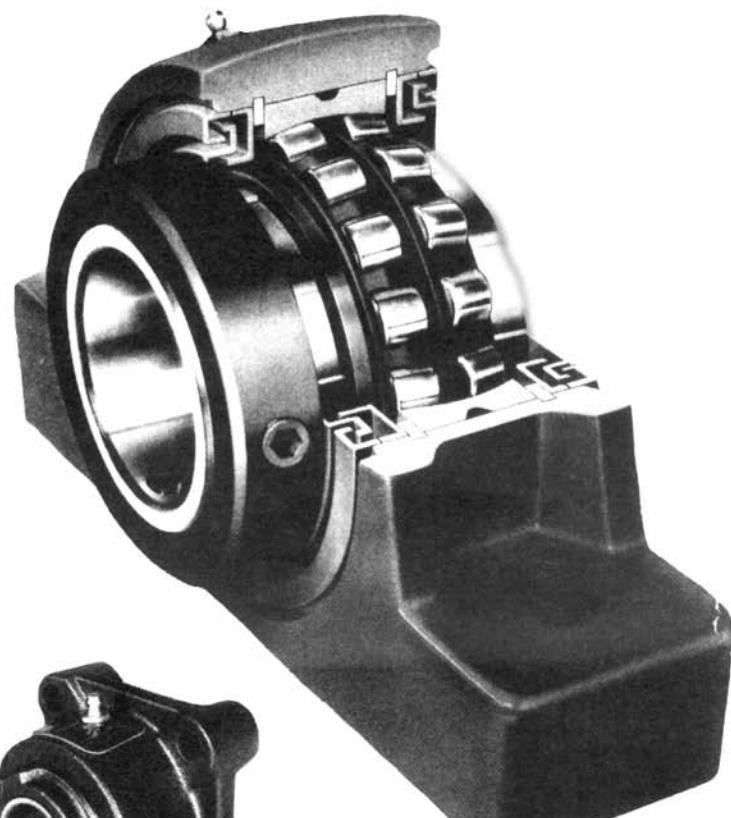

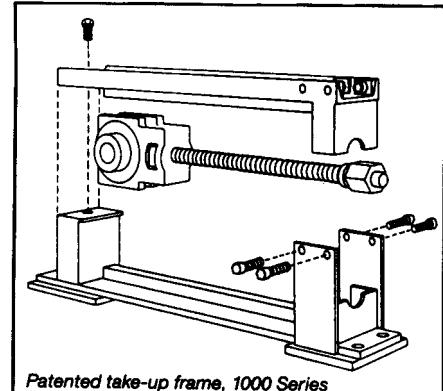

## BROWNING MOUNTED BEARINGS

Browning bearing technology pays off on the application - where it counts most - through rugged design, low maintenance and wide selection.

Choose from all these optimum selectivity factors:

- Ball bearings in two complete series of matching sizes and mounts; Masterline for top-of-the-line quality and wide range of mounts; Valuline for maximum economy combined with high serviceability.  $1\frac{1}{2}$ " to  $3\frac{15}{16}$ " bores, setscrew and eccentric lock.
- Tapered roller bearings, 1" - 5" bores, using unique Centrap or flinger grease seals to keep out dirt and contaminants.
- Spherical roller bearings - 1000 series with  $1\frac{1}{8}$ " to 4" bores; rugged 22500, 22200 and 23000 series with  $2\frac{7}{16}$ " to  $9\frac{1}{2}$ " bores; and new 1100 series offering the rugged extra strength of ductile housings, in bores up to  $3\frac{1}{2}$ ".
- High and low series pillow blocks.
- Two, three and four-hole flange blocks.
- Eccentric locking, setscrew locking, adapter mount or interference fit.
- Side-mounted or protected screw type take-ups with patented top removal feature.

Wide selection, exclusive features, delivery from stock...all make it logical to look to Browning for a direct bearing on lower costs!

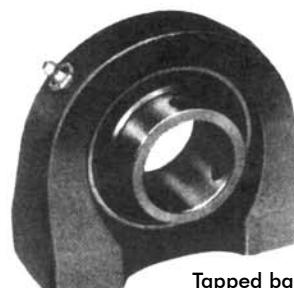

Tapered roller bearing flange block, E920 Series

Spherical roller bearing pillow block, 1000 series

Valuline ball bearing flange block, 200 Series

Tapped base pillow block 200 Series

## BROWNING MOUNTED BEARINGS

### BALL BEARING UNITS

Series	Type Lubrication	Type Locking	Bore Sizes		Take-Up Frames Range of Travel
			Pillow Block (High & Low Series)	Flange Block (2, 3 & 4 Hole)	
100	Relube & Non-Relube (Valuline)	Setscrew & Eccentric	1/2" - 1 7/16" **	1/2" - 17/16" **	-
200*	Relube & Non-Relube (Valuline & Masterline)	Setscrew & Eccentric	1/2" - 2 7/16"	1/2" - 2 15/16"	1 1/2" - 18"
300	Relube & Non-Relube (Valuline & Masterline)	Setscrew & Eccentric	1" - 3 15/16"	1" - 3 15/16"	3" - 18"

\*Also available in tapped base type, 2" max bore.

\*\*Also available with Malleable housings.

Note: 100 Series have narrow inner ring; 200 and 300 Series have wide inner ring.

### TAPERED ROLLER BEARING UNIT

900	Relube/Centrap Seal	Eccentric	1" - 5"	1 - 4	12 - 24
E920	Relube	Setscrew (2 Collars)	1 3/16" - 5"	1 3/16" - 4"	12 - 30
950	Relube/Centrap Seal Expansion & Non-expansion - Self-aligning	Eccentric	1 7/16" - 5"	1 7/16" - 5"	-
970	Relube/Face Contact Seals - Expansion & Non-expansion - self aligning	Setscrew (2 Collars)	1 7/16" - 5"	1 7/16" - 5"	-

### SPHERICAL ROLLER BEARING UNITS

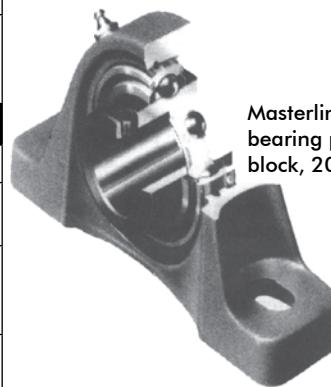

1000	Relube/Multi-Trap Seal Expansion & Non-expansion - self-aligning	Setscrew	1 1/8" - 4"	1 1/8" - 4"	12 - 30
1100	Relube/Multi-Trap Seal Expansion & Non-expansion - self-aligning	Setscrew	1 5/16" - 3 1/2"	1 5/16" - 3 1/2"	-
22500	Relube - Triple Labyrinth Seal Expansion - Non-expansion	Adapter Mount	2 7/16" - 8"	-	18 - 48
22200		Interference Fit	80 - 220mm	-	-
23000		Adapter Mount	8 7/16" - 9 1/2"	-	-

### SINTERED BRONZE BEARING UNITS, SPHERICAL BEARING CARTRIDGE

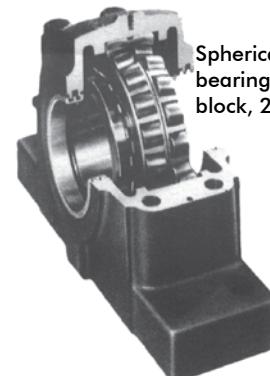

50	Felt-packed Oil Reservoir	1/2" - 1 1/4"	1/2" - 1	-

## BROWNING SPEED REDUCERS

**Advanced gear technology makes the critical difference.**

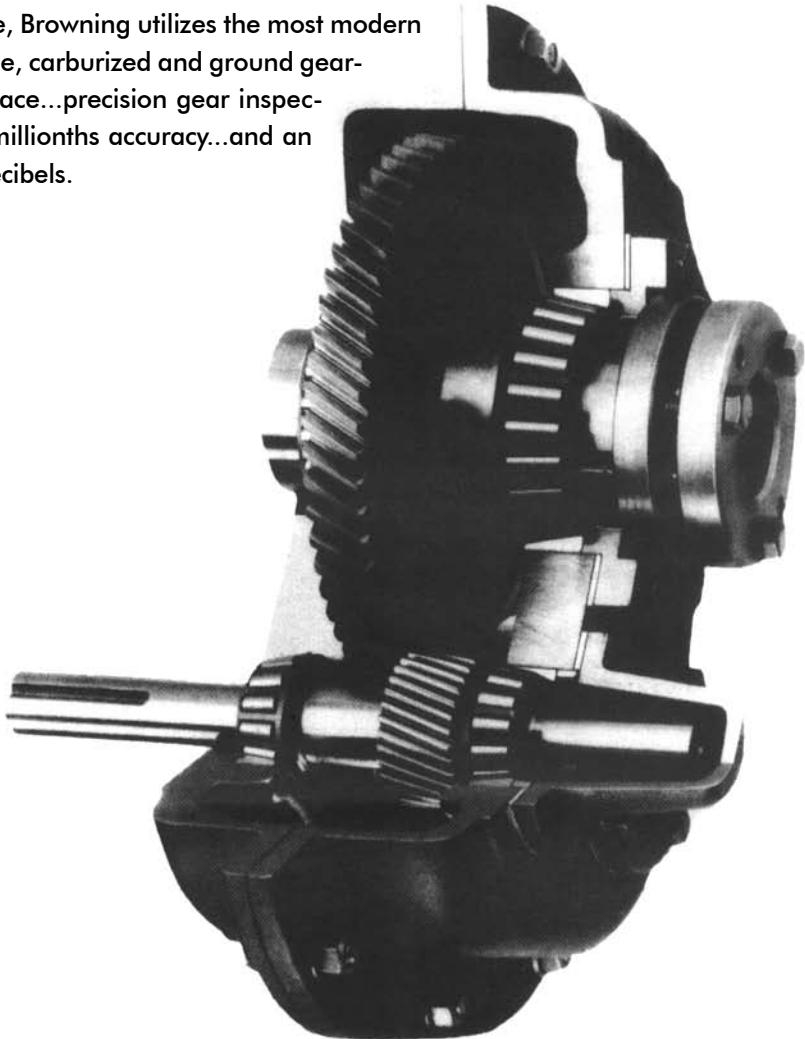

Through advanced technology in gear engineering and manufacturing, Browning continues to bring innovative new speed reducer designs to industry...

- New RAIDER worm gear speed reducers which are available in four basic units and standard component accessories that provide over 10 million different reducer configurations.
- RANGER worm gear speed reducers with aluminum housings, whose space-saving, lighter weight design provides up to 50% savings in performance and economy.
- Helical shaft mount reducers with exclusive patented TorqTaper bushing for easy-on easy-off mounting power and longer service life, with more than 20,000 stock configurations.

To assure consistent dependability and long service life, Browning utilizes the most modern methods of production and quality control. For example, carburized and ground gearing, AGMA rated for new higher capacities in less space...precision gear inspection laboratory to check indexing errors down to 20 millionths accuracy...and an audiometric chamber for testing noise as low as 55 decibels.
